1.21	Providing and laying Cast in situ/Ready Mix cement concrete M-30 of trap/ granite /quartzite/ gneiss metal for R.C.C. slabs and landings as per detailed designs and drawings including steel centering, formwork, cover blocks, laying/pumping, compaction finishing the formed surfaces with cement mortar 1:3 of sufficient minimum thickness to give a smooth and even surface or roughening if special finish is to be provided and curing etc. complete.(Excluding reinforcement and structural steel).with fully automatic micro processor based PLC with SCADA enabled reversible Drum Type mixer/ concrete Batch	109.20	Cum	24500	2675400.00	26950	2942940

	mix plant (Pan mixer) etc. complete. With fine aggregate (Natural Sand / Crushed sand VSI Grade finely washed etc) SSR 25.74 / 237						
1.22	Providing and fixing in position TMT - FE - 500 bar reinforcement of various diameters for R.C.C. pile caps, footings, foundations, slabs, beams columns, canopies, staircase, newels, chajjas, lintels pards, copings, fins, arches etc as per detailed designs, drawings and schedules. including cutting, bending, hooking the bars, binding with wires or tack welding and supporting as required complete. SSR 26.33 / 245	139.15	MT	105000	14610750.00	156200	21735230
1.23	Providing and applying Anti corrosive treatment to reinforcement as per cement polymer composite coating (C.P.C.C.) method developed by C.E.C.R.I. including cleaning the bar by means of any established mechanical or manual method for removing rust and deleterious material, applying rapid setting primer and cement polymer sealing coat of approved and licensed by CECR including redoing the process if damage occurs during handling, stacking etc. complete. (With prior approval of SE)	139.1544	MT	5500	765349.20	13036.1	1814030.67
1.24	Providing filling of Micro-concrete and 10mm aggregate (1:1) including scarificial leak proof MS shuttering includes the cost of hire charges of all machineries, barge, boat , cost of all tools and all labour charges etc., complete.	1.68	Cum	320000	537600.00	352000	591360
1.25	Providing and laying weep holes of 100 mm diameter PVC pipes as per drawing for abutment returns, return walls etc. Complete.	302.4	Running Meter	560	169344.00	616	186278.4
1.26	Providing and laying of filter media with granular materials/ stone crushed aggregates satisfying the requirements laid down in clause 2504.2.2 of MoRTH specifications to a thickness of not less than 600 mm with smaller size towards the soil and bigger size towards the wall and provided over the entire surface behind abutment, wing wall and return wall to the full height compacted to a firm condition as per drawing and technical specifications etc, complete.	245.7	cum	4000	982800.00	4400	1081080
1.27	Providing and fixing in position steel fibre reinforced concrete (SFRC) frame and covers of approved make including, 0.90 x 0.60 m in size loading, unloading, transportation, all taxes etc. complete as directed by Engineer-in-charge(20 tonnes capacity)	42	Nos	14200	596400.00	15620	656040
1.28	Providing and laying concrete pipes of I.S.N.P. class of 150mm diameter in proper line, level and slope including necessary collars, excavation, laying, fixing with collars in cement mortar 1:1 and refilling the trench complete.	21	Running Metre	1250	26250.00	1375	28875
1.29	Providing and laying concrete pipes of I.S.N.P. class of 225mm diameter in proper line, level and slope including necessary collars, excavation, laying, fixing with collars in cement mortar 1:1 and refilling the trench complete.	21	Running Metre	1450	30450.00	1595	33495
1.3	Providing and laying concrete pipes of I.S.N.P. class of 300mm diameter in proper line, level and slope including necessary collars, excavation, laying, fixing with collars in cement mortar 1:1 and refilling the trench complete.	21	Running Metre	1450	30450.00	1595	33495

1.31	Providing and casting in situ or precast tapering R.C.C. M-20 Barrier type Kerb without gutter (as per IRC861983) embedded 125mm below ground level over M-10 PCC finished neatly with C.M. I.2, setting the same in C.M. I.2, including the required excavation in any strata and removing the excavated stuff anywhere in city and redoing the surface as specified and directed by Engineering In-charge. Using Concrete Batching and Mixing Plant	136.5	Cubic Metre	27500	3753750.00	30250	4129125
1.32	Providing and Fixing Processed Stone Cladding on wall surface /plywood surface. RCC pardi /Wall and all type of Interior, Exterior Compound wall and Gate etc. of cladding processed stone with material of Processed clay, Wooden chips, Silica sand, Cement, GFRC admixtures, Colour pigments, Fiber up to thick of 230mm/ 25mm including scaffolding, fixing of screw, etc. (As directed by Engineer in Charge)	2012	Sqm	11500	23138000.00	12650	25451800
1.33	Extra for providing additional thickness of brickbats over 100 mm in 1.5 c.s. either due to location of rain water pipes or due to increase in the travel length of flow of rain water or brick bats required in the sunk portion of baths, W.C.s nahani etc. The rate includes for fixing brickbats in C.M., with waterproofing compound as per specification as directed.	413	Cum.	15500	6401500.00	17050	7041650
1.34	Providing and applying one pack bonding coat between concrete members like RCC slabs, columns, beams, chajjas, pardi set and cement mortar plaster using Bonding Agent of approved make & approved by Engineer in charge. Clean the concrete surface thoroughly to remove dust, dirt, grime, desutting oils and rub down to a clean surface. Apply Bonding agent of approved make & approved by Engineer in charge by spray on the entire concrete surface. Provide a lean cement-sand dash coat over the same. Allow the dash coat to set for around 24 hours. Further plastering as per specifications	573	Sqm	325	186225.00	357.5	204847.5
1.35	Providing and fixing polished natural stone tiles as specified below of approved quality, pattern and colour for dado including preparing the surface and levelling in the desired line, backing of 20 thk. cement mortar in porportion 1:3, square cut top edge or chamfered top edge, grooving, moulding etc in cement mortar 1:3, cement float, machine cutting, leveling, jointing, filling the joints with neat cement or pigment mixed with cement, polishing, finishing, curing etc complete as directed by Engineer in Charge (Gangaw Granite or Equivalent)	462	Sqm	9650	4458300.00	10615	4904130
1.36	Providing & Fixing in position, Carpet more than 1200 gsm, made with 100% stain proof fibres of approved make along with 5mm underlay as per Architectural & Acoustical Design & Instructions & Complete in all aspects including all materials labour, finishing etc complete	1247	Sqm	4450	5549150.00	4895	6104065
1.37	Providing leather finished polishing to Granite Stone slab by continuous grinding in 4 coats of different bits to receive rough and matt finish including buffing process before laying and fixing of stone as per drawing and design, including cleaning, washing and finishing etc. complete	1250.00	Sqm	756	945000.00	831.6	1039500
1.38	Providing wax polishing to floors and dado, preparing the surface, scaffolding etc. complete.	2950.00	Sqm	463	1365850.00	509.3	1502435
1.39	Providing Mirror polishing to Kota Stone including using all necessary stones and equipments cleaning, washing etc. complete. For Flooring	503.00	Sqm	156	78468.00	171.6	86314.8

1.4	Providing Mirror polishing to Kota Stone including using all necessary stones and equipments cleaning, washing etc. complete. For Skirting	98.00	Rmt	83	8134.00	913	8947.4
1.41	Rounding the edge in half round shape of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge a) Kota stone	138.00	Rmt	150	20700.00	165	22770
1.42	Rounding the edge in half round shape of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge c) Any type of Granite stone	500.00	Rmt	210	105000.00	231	115500
1.43	Chamfering the edge of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge a) Kota stone	500	Rmt	120	60000.00	132	66000
1.44	Chamfering the edge of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge c) Any type of Granite stone	500	Rmt	190	95000.00	209	104500
1.45	Providing & making 5mm gap in flooring & dado by using Spacer and gap to be filled with epoxy polymer based grout of Bal Endura make to match the colour & shade of flooring tiles as per instruction of Engg. In charge etc complete.	1823.096 165	SMT	750	1367322.12	825	1504054.336
1.46	Providing and fabricating structural steel work in rolled sections like joists, channels, angles, tees etc. as per detailed design and drawings or as directed including cutting, fabricating, hoisting, erecting, fixing in position making riveted / bolted /welded connections without connecting plates, braces etc. and including one coat of epoxy paint and over it two coats of oil painting of approved quality and shade etc. complete.	15.95	MT	345000	5502750.00	379500	6053025
1.47	Providing and fixing double scaffolding system (cup lock type) on the exterior side of building/ structure, including additional rows of scaffolding in stepped manner as per requirement of site, made with 40mm dia M.S. tube, placed 1.5metre centre to centre, horizontal & vertical tubes joint with cup & lock system with M.S. Tubes, M.S. tube chalis, M.S. clamps and staircase system in the scaffolding for working platform etc. and maintaining it in a serviceable condition for execution of work of cleaning and/ or pointing and/ or applying chemical and removing it there after. The scaffolding system shall best if fened with bracings, runners, connecting with the building etc., wherever required, if feasible, for inspection of work at required locations with essential safety features for the work men etc., complete as per directions and approval of Engineer-in-charge.	94114	Sqm	650	61174100.00	715	67291510
1.48	Providing & fixing in position 35 mm thick 1st quality water proof Single Leaf Flush Door for w.c. with 1mm thick laminate on both sides with 12x35mm lippping patti on all edges. Rate is inclusive of s.s. fixtures & fittings, such as handles on both sides, tower bolts, locking arrangement, door stopper of make (Dorma, Geze, Hafle) 450 x 150mm aluminum ventilation grill powder coated, as per architect's detailed drg and design etc complete	41	Sqm	28500	1168500.00	31350	1285350
1.49	Single Leaf Flush Door Providing and fixing of single leaf flush door with shutter to be made of 35 mm thick marine grade block board core with teak wood lippping patti & 1 mm thick approved decorative laminate finish on both faces. All exposed T.W. surfaces to be painted in 2 coats of flat enamel paint of approved shade over 1 coat of primer of approved make including preparation of surface. All surfaces of	26	Sqm	28500	741000.00	31350	815100

	frame, in contact with brick masonry or concrete should be tar painted. (Black Japan). All other necessary fittings and fastenings to be of chrome finish brass. (Unless otherwise mentioned in the drawing)						
1.5	Fire rated Double leaf Door - Laminate Finish. Providing & Fixing of Wooden Fire door without Panic Bar of approved make and of required size, 120 minutes fire rating, integrity and insulation in accordance with the criteria of BS 476 : Part 22 : 1987 and report 212 (1)FR/2003; Insulation on door leaf only. Tested at Fire Research Laboratory, Central Building Research Institute, Roorkee with standard heating conditions as specified in IS : 3809-1979 and BS . 476 part 20 & 22, 1987 to achieve the required integrity & insulation (i.e. to restrict the heat radiation, temperature rise on the non fire side to the maximum of 140 degree Centigrade above the ambient temperature on the unexposed surface of the shutter). Red Mirrami Hard wood frame of section 145mm x 70mm with Intumescent strip (Imported) to take care of Hot and cold smoke of size 10mm x 2mm x 24nos. Concealed in the grove of the frame and 35mm thick single leaf shutter made out of perimeter railing of Red Mirrami wood of size 100mm x 29mm and promina 60.9mm thick Calcium Silicate Board Fire Retardant compound on each side coated with Intumescent sealant and faced with 4mm thick marine ply with Fire and smoke Intumescent Seal of size 20mm x 2mm x 1 No., mounted in the grooves in the shutter on all sides except bottom with 10mm thick Hardwood beading on all side. The Fire Doors with frame will be as per IS: 3614 part 2 and BS: 476 part 20 at FRL. CBRJ Roorkee with standard heating conditions as specified in IS: 3809 - 1979 and BS: 476 part 20 & 22 1987. The door shall be finished with 1 mm thick fire retardant laminate on both side etc., with approved Stainless steel fittings & Fixtures all complete to the entire specification as per Architect's Instruction.FRD -2 SIZE- 1.250 x 2.350m as Directed by Engineer Incharge.	12	Sqm	45000	540000.00	49500	594000
1.51	Providing and fixing ISI marked double swing flush door shutters conforming to IS 2202 (Part I) Non-decorative type, core of block board construction with frame of 1st class hard wood and well matched teak 3 ply veneering with vertical grains or cross bands and face veneers on both faces of shutters. 30 mm thick including ISI marked Stainless Steel L-hinges with necessary screws. Fittings & Fixtures per leaf SS kick plates on both sides of the door of 300mm height Heavy Duty satin finish butt SS Hinges (100mm x 75mm x 3mm in size)-4 nos. SS finished lever handle with mortise lock- 1 One Number Floor spring- 1 One Number 100mm x 100mm safety glass at the specified location	3.168	Sqm	13125	41580.00	14437.5	45738
1.52	Supply, installation, testing and commissioning of extruded aluminium powder coated linear 8" Grilles for Supply /Return grill without volume control dampers.	2.86	SMT	11752	33610.72	12927.2	36971.792
1.53	Supply & Installation laminate 1mm thk both side laminate hydraulic pressed by machine make century virgo Or Equivalent as directed by Engineer in charge etc completed	161.57	SMT	3400	549338.00	3740	604271.8
1.54	Supply & Installation SS ball bearing butt hinges 5" each door make (Dorma, Geze, Hafele) as directed by Engineer in charge etc completed	136	nos	542	73712.00	596.2	81083.2
1.55	Supply & Installation Surface mounted door closer With standard arm size 2 each	34.00	nos	4902	166668.00	5392.2	183334.8

	door make (Dorma,Geze,Hafle) as directed by Engineer in charge etc completed						
1.56	Supply & Installation Pull handle back to back fixing each door make (Dorma,Geze,Hafle) as directed by Engineer in charge etc completed	68.00	nos	1806	122808.00	1986.6	135088.8
1.57	Supply & Installation autodrop seal each door make (Dorma,Geze,Hafle) as directed by Engineer in charge etc completed	34	nos	4730	160820.00	5203	176902
1.58	Supply & Installation mortise Cylinder dead lock back set,24mm forend With Euro profile double cylinder keyed Diff.Door lock 1 each door make (Dorma,Geze,Hafle) as directed by Engineer in charge etc completed	17	nos	3223	54791.00	3545.3	60270.1
1.59	Supply & Installation 10mm tk rod 55 tower bolt 4 each door make (Dorma,Geze,Hafle) as directed by Engineer in charge etc completed	68	nos	671	45628.00	738.1	50190.8
1.6	Making holes in 75 mm to 200 mm brick/concrete/rubble walls for drainage pipes, fittings, etc. and making good the same in cement mortar 1:3 or cement concrete 1:2.4 & finishing on both sides with cement plaster and 3 coats of white or colour wash as directed by Engineer in charge etc. complete.	100	Nos	2838	283800.00	3121.8	312180
1.61	providing and fixing RCC CHAMBER COVER 900*450 size capacity 10MT /Sqm as per instruction by engineer incharge	30	Nos	17500	525000.00	19250	577500
1.62	Compacting the hard murum side widths including laying in layers on each side with power roller including artificial watering etc. complete	27060.00	Sqm	50	1353000.00	55	1488300
1.63	Providing and laying wedge shear elemental layer (WSEL) by using rubble stone of size 15 to 20 cm thick in single layer of 230 mm including packing the same with 20 mm to 40 mm thick aggregates (normal size) and using stone powder of 40 mm to 50 mm thick on surface and watering & compacting by vibratory roller confirming layer thickness of minimum 200 mm and as directed by Engineer - in - charge etc complete.	2706.00	Cum	4000	10824000.00	4400	11906400
1.64	Providing, laying, spreading and compacting stone aggregates of specific sizes to water bound macadam specification including spreading in uniform thickness, hand packing to proper grade and camber, applying and brooming requisite type of screening/ binding Materials to fill up the interstices of coarse aggregate, watering and compacting with Intelligent Compactor with compaction analyzer and VSat attachment to the required density. By Manual Means Grading II (Using Screening Type B (11.2 mm) Aggregate)	676.50	Cum	6500	4397250.00	7150	4836975
1.65	Providing and Laying M60 grade cement concrete of approved mix design with avg. Flexural strength of 4.4 MPa in 3 days from R.M.C. plant incld. use of micro silica/alcofine, approved make super plastiser and retarder, fibrillated 100 % virgin polypropylene fibres, fly ash and transported by transit mixer and placing at work site. Compacting, finishing, initial curing by approved curing compound/ contractors water and tarring the sides of slab with hot bitumen as specified and as directed (w/c ratio 0.28 max.). (vatta for curing will be paid separately) for Ultra thin White Topping (UTWT) pavement. etc completed.	677.00	Cum	18500	12524500.00	26950	18245150
1.66	Green Cutting of construction & dummy joints of concrete grade M 40 and above (UTWT) pavement by mechanical means within 10 to 12 hrs after casting of bay / slab upto 1/3 rd depth of pavement and 5 to 6 mm wide as directed	15000.00	Kmt	160	3040000.00	176	3344000

1.67	Providing and Placing 5mm thick Thermocole in dummy and construction joints immidiately after cutting of joints and removing the same before dressing of dummy and construction joint as directed	19000.00	Rmt	90	1710000.00	99	1881000
1.68	Providing and construction of cement vatta in C.M.L.10 at 0.6 M X 0.6 M c/c admeasuring 0.09 meter at bottom, 0.04 m at top and 0.075 m deep and maintaining the same throughout 7 days curing period and removing the same material as directed.	4510.00	Sqm	104	469040.00	114.4	515944
1.69	Sealing of M-35 & above new C.C. pavement dummy, transverse, longitudinal joints with hot rubberised sealing compound conforming to IS 1834-1984 after proper cleaning with compressed air, applying required primer & providing a layer of lime powder over hot sealing compound as directed. Sealing 5mm - 6 mm wide & avg. depth of 40 mm transverse & longitudinal joints	19000.00	Rmt	101	1919000.00	111.1	2110900
1.7	Providing and laying of hot applied thermoplastic compound 2.5mm thick White /Yellow including reflectorising glass beads @250 gms per sqm area, thickness of 2.5mm is exclusive of surface applied glass bead as per IRC 35. The finished surface to be level, uniform and free from streaks and holes etc complete with 3 years guarantee	50.00	Sqm	1049	52450.00	1153.9	57695
1.71	Providing and Fixing Speed Breakers of Size 350 W x 500 L x 50 H mm yellow-black color as shown in the drawing with necessary fittings & fixtures as directed by EIC	50	Rmt	5083	254150.00	5591.3	279565
1.72	Supplying and Fixing of Molded Shank Raised Pavement Markers / Cat's Eye made of polycarbonate and ABS moulded body and reflective panels with microprismatic lens capable of providing total internal reflection of the light entering the lens face and shall support a load of 16000 kg tested in accordance to ASTM D4280 Type Hand complying to Specifications of Category A of MORTH Circular No RW/NH/33023/10-97DODH Dt 11.06.1997. The height, width and length shall not exceed 50mm, 100mm and 102+/-2 mm and with minimum reflective area of 13 Sqcm one ach side and the slope to the base shall be 35+/-5 degree. The strength of detachment of the integrated cylindrical shanks , (of diameter not less than 19+/-2mm and height not less than 30+/-2mm) from the body is to be a minimum value of 500Kg. Fixing will be by drilling holes on the road for the shanks to go inside, without nails and using epoxy resin based adhesive as per manufacturer's recommendation and complete as directed by the engineer. The contractor shall submit a two year warranty for satisfactory field performance including stipulated retro-reflectance of the reflecting panel, to the Engineer.	50	Nos	1176	58800.00	1293.6	64680
1.73	Design, supply & installation of 4 mm thick Aluminium Composite Panels (ACP) of Alcopla make or other equivalent approved make, material consisting of 3mm thick FR grade mineral core sandwiched between two aluminium sheets (each 0.5 mm thick). The fixing will be done fabrication comparable Durol or other equivalent company Backup MS GJ frame work, & aluminium frame along with backer rod, Dow corning Silicon sealant etc complete as directed by the engineer. The rates should include provide design alongwith shop drawings and getting approval from consultant ACP CLADDING	6034	Sqm	12600	76028400.00	13860	83631240
1.74	Fire Sealant For Pipe And Duct Holes And Any Other. Supplying, Loading, Unloading,	10	Cum	18828	188280.00	20710.8	207108

	Installations, Testing , Commissioning of fire resistant mortar (20 kg) with fire resistance class S90 as per National Electrical Code (NEC) SP30-2011 suitable to seal the openings with all kinds of cables, pipes and cable support system in steel and aluminium and plastic profiles (Except hollow core conductors). The residual openings shall be closed with filler as Directed by Engineer Incharge.						
1.75	Providing and Fixing of GI Lay in Plain metal ceiling consisting of 600x600mm Lay in tiles of pre coated galvanized steel in 0.5 mm thickness in Global white color tile to be laid on grid systems with 15mm wide T - section flanges color white having rotary stitching on the Main Runner, 1200 mm and 600 mm Cross Tees. Providing and Fixing of GI Lay in Plain metal ceiling consisting of 600x600mm Lay in tiles of pre coated galvanized steel in 0.5 mm thickness, in Global white color tile to be laid on grid systems with 15mm wide T - section flanges color white having rotary stitching on the Main Runner, 1200 mm and 600 mm Cross Tees products approved as per GRIHA and BS 476 etc. complete.	149	Sqm	4000	596000.00	4400	655600
1.76	Providing & Fixing Sliding window systems are manufactured from Rigid Thermo Vinyl Polymer (RTVP) Profiles suitable for tropical development. The profile are with multichambered construction. The nominal thickness of outer wall is 2 MM. The outer frame size is 105 x 52 mm Roller shutter frame 60 x 27 mm & Handle shutter frame 52 x 30mm. Glass panels used in window system shall be of 6mm thick clear float glass manufactured by Modiguard/Saint Gobin/Asahi or any other approved equivalent. The window systems are prefabricated in factory. All the corners of outer frame & shutter are fusion welded under pressure to a pre-determined temp. & time as per the specification & design. The structural reinforcement chambers are not exposed to any drainage routing. The steel reinforcements are 1.5mm thk hot dip galvanised & passivated for corrosion resistance & tropical development. Sliding track is made of UPVC profile, which is the part of outer frame for smooth movement of shutter. Sliding roller assembly consist of Nylon Roller & Zinc Alloy casting body. Mosquito frame is part of the sliding outer frame. Gaskets are made of Ethylene Propylene Dieneomer (EPDM) which has good weathering properties & resistance to tear & decay to OZONE & U.V exposure as per manufacturers specification as directed by Engineer in Charge etc. complete as Directed by Engineer Incharge.	19	Sqm	14000	266000.00	15400	292600
1.77	Providing and fixing SS Mosquito mesh in anodised (anodic film must not be less than 15 microns i.e. AC-15 as per IS, the anodising must be sealed by keeping the anodized section in boiling de-anodized water for a period of one hour) aluminium shutter fixed in sliding / openable / fixed windows conforming to IS:1948-1961 as per drawing and directed by Engineer In Charge (Note: For Aluminum Sections, total weight shall be upto 3.5 kg/sq.m.)	8	SQM	2600	26800.00	2860	22880
1.78	SITC of Elevio Automatic Elevator with: - Rated capacity :- 20 Passenger/1360Kg - Floors :- G+1 floor (2Stops/2 Landings) - Travel :- 4.5 mtrs - Location of Lift Machine:- MRL - Rated speed :- 1.0mps VS - Car/Landing door clear opening of 1000 mm wide x 2000 mm high	1	Job	4500000	4500000.00	4950000	4950000

1.8	Providing & fixing European type white glazed earthenware water closet of pottery,Hindware or equivalent MAKE,wall hung closet to be used with cistern as per Model No. 89334 with size (H X W X P) 51cm x 35cm x 76cm pan including 'P' or 'S' trap with white bakelite including C.I. soil & vent pipes upto the outside Market Ratece of the wall and 100 mm dia. C.I. Plug bend, and flush bend and inlet pipe with brackets for fixing the cistern 40 mm dia. G.I. overflow pipe, painting of the exposed pipes and cutting and making good and floors as directed by architect & Engineer-In-Charge etc complete	21	Nos	23753	498813.00	26128.3
1.81	Providing and fixing C.P.Two way BIB cock pottery make or equivalent Quattro collection (CAT.NO. T2334A1) including necessary sockets/union nut etc. complete.	26	Nos	3729	96954.00	4101.9
1.82	Providing and fixing C.P.Auto Closing concealed urinal flush valve pottery make or equivalent lapis collection (CAT.NO. G2030A1) including necessary sockets/union nut etc. complete.	13	Nos	2973	38649.00	3270.3
1.83	Providing and fixing C.P.Auto Closing concealed WC Dual flush valve pottery make or equivalent (CAT.NO. T3305A1/T3307A1) including necessary sockets/union nut etc. complete	26	Nos	5509	143234.00	6059.9
1.84	Providing and fixing 15 mm diameter PVC Aqua kraft type pottery make or equivalent make super jet spray with flange 2 in 1 faucet 1.50 metre long including all accessories etc complete	26	Nos	1781	46306.00	1959.1
1.85	Providing & Fixing 46 x 30cm. Size of white glazed vitreous chinaware Square shape wash Basin of pottery,Hindware or equivalent MAKE, Model No. 895V wash basin Square overcounter including cold water concealed pillar taps, brackets, rubber plugs and brass chain, stop tap, chromium plate bottle trap and necessary pipe connections including UPAC waste pipe and trap upto the outside face of the wall, painted with two coats of white enamel paint over a coat of white enamel paint over a coat of anticorrosive primer, 32mm dia. PVC inlet connection etc. complete (32 mm dia. G.I. waste pipe is measured and will be paid separately) Rate to include making necessary connection to Nahani trap / waste as directed by architect & Engineer-In-Charge etc complete	22	Nos	17164	376288.00	18814.4
1.86	Providing and fixing white vitreous urinal basin of pottery,Hindware or equivalent MAKE , Series whiz Model No. 0580 with standard flush pipe and C.P. brass spreaders with brass unions and G.I clamps complete, including painting of fittings and brackets, cutting and making good the walls and floors wherever required as directed by architect & Engineer-In-Charge etc complete	13	Nos	25000	325000.00	12289.2
1.87	Providing and fixing C.P. wall mixer with provision for overhead shower with 115mm long bend pipe and wall flange jaguar or equivalent make continental (CAT.NO. T2316A1) including necessary sockets/union nut etc. complete.	1	Nos	25000	25000.00	12866.7
1.88	Providing and fixing SS 304 Towel rail (24") pottery, hindware or equivalent make including all fitting etc completed	1	Nos	1700	1700.00	1494.9
1.89	Providing and fixing SS 304 Soap dish pottery, hindware or equivalent make including all fitting etc completed	3	Nos	1089	3267.00	1197.9
						3593.7

1.9	Providing and fixing SS 304 Toilet paper holder perryware, hardware or equivalent make including all fitting etc completed	26	Nos	2500	65000.00	1818.3	47275.8
1.91	Providing and fixing SS 304 Towel ring perryware, hardware or equivalent make including all fitting etc completed	26	Nos	1250	32500.00	1057.1	27484.6
1.92	Providing and fixing SS 304 Twin robe hook perryware, hardware or equivalent make including all fitting etc completed	26	Nos	1250	32500.00	649	16874
1.93	Providing and fixing SS 304 Soap dispenser perryware, hardware or equivalent make including all fitting etc completed	22	Nos	2500	55000.00	2241.8	49319.6
1.94	Providing & fixing of HM-MCP Call Point are an addressable manual break glass call point, simple rotary decade, switch at the rear of the unit for addressing, analogue addressable communications, Integral LED, EN54 approved. Make :- Honeywell Morley Model No. :- HM-MCP-FLEX	4	NOS	6803	27212.00	7483.3	29933.2
1.95	Providing & fixing of The Wall Mount sounder strobe integrates a 32 tone sounder and high quality strobe into one device. It is powered by the fire panel via the loop wiring. Control of the device is enabled using on-board switches, some of which can also be adjusted through SS Advanced Protocol. The device is installed simply by a twist fit onto the B501AP base. Supply Voltage: 15 to 29VDC (Non-isolation) 15 to 29VDC (Isolation) Standby Current: 120µA (Non-isolation) 225µA (Isolation) Max current consumption sounder and strobe: 14.5mA (High Volume Tone 11 @15V) Max Sound Output 97dB(A) +/-3dB @1metre (High Volume, Tone 8 @24V) [Tone Dependant - Figure stated is based on high volume 970Hz continuous @24VDC] Make :- Honeywell Morley Model No. :- WSO-PR	7	NOS	10205	71435.00	11225.5	78378.5
1.96	Providing & fixing of addressable four-loop, fire detection system supports Morley protocol. It comes with two sounder circuits (1A max), a 2A power source, a general relay (Alarm and Fault), one programmable relay, a fixed auxiliary output and resettable 24V 250mA output, two keys and two inputs for programmable functions. It also includes a 6 * 40 LCD graphic display, an integrated USB port for PC programming and an RS485 port for repeaters. Total Loop Capacity (396 Detector +396 Devices) Networking up to 16 loops 6x40 characters, blue liquid crystal display with backlight illumination Configuration by keypad and PC 160 Fire Zones Fire, Fault and Auxiliary relays Loop-Battery calculator for reliable system design 7 day timer Onboard diagnostic EN54-2, EN54-4 LPCB approved Optional 40, 80 or 160 zone alarm LEDs Make :- Honeywell Morley Model No. :- DX4C	1	NOS	417094	417094.00	458803.4	458803.4
1.97	SITC of 1100 V grade XLPE insulated sheathed & steel armoured copper Conductor cables. Unloading by crane, shifting to place of work and laid on walls / ceiling / ready made trench / Cable tray / Through underground RCC pipes / including spacers / saddles / clamps / G.I. Hardware as required,	850	RM	211	179350.00	232.1	197285

2.74	<p>Supplying, Loading, Unloading, Installations, Testing , Commissioning of Diesel generating set with alternator of 500 KVA output continuous rating, 3 Phase, 415 V, 50c/s 0.8 p. f. A.C a totally enclosed liquid cooled multi-cylinder diesel engine developing suitable BHP at 1500 rpm with 10% overload for 1 hour in 12 hours, alongwith standard accessories, self excited self regulated, screen protected alternator with static excitation system running at 1500 RPM as per IS 4722-2001 with voltage regulation +/- 5 %. Both the engine and alternator direct coupled on a common fabricated steel base frame and mounted on anti vibratring pads with standard control panel comprising meters, switchgears, indicators connected with suitable wires/cables, the complete set enclosed in composite Acoustic enclosure as fully assembled integral unit made of 16 SWG CRCA Sheet, sound absorbing material to restrict sound level upto 75 dB at 1.0 m, provided with first filling of oil, diesel etc. and obtaining necessary approval from Electrical Inspector/MSEB/MPCB/PWD as per specification, The engine filling of oil, diesel etc. whenever required upto handing over to User department. The DG set shall include all accessories items, protections, safety parameters, control Panel compatible with BMS (IP/BACNET/ ALL TYPE OF POTENTIAL FREE CONTACTS/ MODBUS ETC), base frame with anti-vibration mount pad, fuel tank of 8 Hour capacity(750Ltrs to 999 Ltrs Tank capacity) with indicator, fuel pipe with pump, residential type exhaust silencer, 2X12 volt 180 amp-hour battery complete with copper conductor battery leads of required length and socket/clamps including G.I. stands for battery with wooden base, adaptor box etc complete as required for a 400 KVA DG Set as per the manufacturer recommendations. 400 KVA DG Set as per CPCB II norms, including No Load and Full load testing at Factory Before dispatched at site. EXHAUST ROUTING TO ATMOSPHERE FROM ENGINE</p> <p>Exhaust system consisting of 10" ERW Pipe including bends, flanges & hardware etc. 10" ERW Pipe including bends, flanges & hardware etc. 1 above exhaust pipe with 50 mm thk. Rockwool slab of 100 Kg/ M3 , wrapped with 24 gauge Aluminium sheet exhaust pipe with 50 mm thk. Rockwool slab of 100 Kg/ M3 , wrapped with 24 gauge Aluminium sheet exhaust pipe & silencer , with one coat of primer and 2 coats of Enamel Paint Insulation for silencer, 50mm thk. Rockwool Slab of 100 Kg/ m3 and wrapped with 24 gauge Aluminum sheet Notes :- 1) Supply of all Misc. materials, required to complete the installation on". Turnkey" basis are to be included in above offer.2)Required working Drawing for foundation to be furnished by Contractor. 3) Work excluded from the scope of supply under " EXCLUSIONS" in covering specification shall be carried out by others but as per D.G. Supplier's instructions and supervision. 4) Charging of batteries is supposed to be included in quoted price for</p>	3.	Nos	8012243	24036729.00	8813467.3	264404019

3.75	Photorealistic Head Modelling story 2 MR. Recreating Model Of The Personality Head in three dimension for it to be used in the process ahead. Three-dimensional (3D) models should represent a physical body using a collection of points in 3D space, connected by various geometric entities such as triangles, lines, curved surfaces, etc. Being a collection of data (points and other information), 3D models can be created by hand, algorithmically (procedural modeling), or scanned MR	1	no.	941760	941760.00	1035936	1035936
3.76	Photorealistic Head Texturing story 2MR In this process you would need to create colours, paints and textures for the above model so that it is realistic, for which you will have to use a method called multi-texturing. Multitexturing is the use of more than one texture at a time on a polygon. For instance, a light map texture may be used to light a surface as an alternative to recalculating that lighting every time the surface is rendered. Microtextures or detail textures will be needed to add higher frequency details, and dirt maps may add weathering and variation; this can greatly reduce the apparent periodicity of repeating textures. Modern graphics may use more than 10 layers, which are combined using shaders, for greater fidelity. Another multitexture technique is bump mapping, which allows a texture to directly control the facing direction of a surface for the purposes of its lighting calculations; it can give a very good appearance of a complex surface (such as tree bark or rough concrete) that takes on lighting detail in addition to the usual detailed coloring. MR	1	no.	561750	561750.00	617925	617925

3.77	Rigging story 2 In this process you will be required to put digital joints and muscles so that the above model can be animated realistically. This technique is used by constructing a series of 'bones,' sometimes referred to as rigging. Each bone has a three-dimensional transformation from the default bind pose (which includes its position, scale and orientation), and an optional parent bone. The bones therefore form a hierarchy. The full transform of a child node is the product of its parent transform and its own transform. So moving a thigh-bone will move the lower leg too. As the character is animated, the bones change their transformation over time, under the influence of some animation controller. A rig is generally composed of both forward kinematics and inverse kinematics parts that may interact with each other. Skeletal animation is referring to the forward kinematics part of the rig, where a complete set of bone configurations identifies a unique pose. Each bone in the skeleton is associated with some portion of the character's visual representation in a process called skinning. In the most common case of a polygonal mesh character, the bone is associated with a group of vertices; for example, in a model of a human being, the 'thigh' bone would be associated with the vertices making up the polygons in the model's thigh. Portions of the character's skin can normally be associated with multiple bones, each one having a scaling factors called vertex weights, or blend weights. The movement of skin near the joints of two bones, can therefore be influenced by both bones. For a polygonal mesh, each vertex can have a blend weight for each bone. To calculate the final position of the vertex, a transformation matrix is created for each bone which, when applied to the vertex, first puts the vertex in bone space then puts it back into mesh space. After applying a matrix to the vertex, it is scaled by its corresponding weight. MR	1	no.	121900	121900.00	134090	134090
3.78	Photorealistic Head Lighting story 2 In this Process you will need to match the lighting of the textured model to the shoot for it to look seamless. It refers to the simulation of light in computer graphics. This simulation can either be extremely accurate, as is the case in an application like Radiance which attempts to track the energy flow of light interacting with materials using radiosity computational techniques. Alternatively, the simulation can simply be inspired by light physics, as is the case with non-photorealistic rendering. In both cases, a shading model will be used to describe how surfaces respond to light. Between these two extremes, there are many different rendering approaches which can be employed to achieve almost any desired visual result. MR	1	no.	231629	231629.00	254791.9	254791.9
3.79	Hologram Head Animation - 10 minutes story 2 MR Computer animation is the process used for generating animated images. The more general term computer-generated imagery (CGI) encompasses both static scenes and dynamic images, while computer animation only refers to the moving images. Computer animation is essentially a digital successor to the stop motion techniques using 3D models, and traditional animation techniques using frame-by-frame animation of 2D illustrations. Computer-generated animations	600	sec.	7876	4725600.00	8663.6	5198160

	are more controllable than other more physically based processes, constructing miniatures for effects shots or hiring extras for crowd scenes, and because it allows the creation of images that would not be feasible using any other technology. It can also allow a single graphic artist to produce such content without the use of actors, expensive set pieces, or props. To create the illusion of movement, an image is displayed on the computer monitor and repeatedly replaced by a new image that is similar to it, but advanced slightly in time.						
3.8	CGI Head Replacement on a Live Action Character and 3D Tracking (12 Minutes) MR This refers to the replacement of the actual human head with the one which is CGI created in a computer software with all the facial animations and lighting. The animated head is then placed/tracked frame by frame over the moving human so as to completely overlap the actual head. MR	720	sec.	2500	1800000.00	6392.1	4602312
3.81	Hologram Visual FX / Holographic Imagery 12 minutes MR. This refers to creating of various graphical/visual elements in tune with the script/storyboard of the desired installation in order to enhance the visual story telling. This involves creation of element in various softwares and then compiling into one visual element. MR	720	sec.	6100	4392000.00	7811.1	5623992
3.82	Creating and Editing the Sound Effects MR Combining (Mixing) the 4K Output Video, the dubbed voice track, the sound effects, and original music into a single Master Video for playback through the Holographic Projection System MR	1	no	276550	276550.00	304205	304205
3.83	Chroma Keying and Roto MR a photographic compositing technique based on the separation of colors in the original images especially blue screen sense. Rotoscoping is the technique of manually creating a matte for an element on a live-action plate so it may be composited over another background. MR	720	sec.	2150	1548000.00	2636.7	1898424
3.84	4K Holographic Rendering MR This refers to the image compilation of the composited output to form the final image/visual. The process involves processing of the various 4k element to be combined to form a single image. MR	24000	frame	412	9888000.00	453.2	10876800
3.85	Compositing MR It represents each media object in a composite as a separate layer within a timeline, each with its own time bounds, effects, and keyframes. All the layers are stacked, one above the next, in any desired order, and the bottom layer is usually rendered as a base in the resultant image, with each higher layer being progressively rendered on top of the previously composited of layers, moving upward until all layers have been rendered into the final composite. Layer-based compositing is very well suited for rapid 2D and limited 3D effects such as in motion graphics, but becomes awkward for more complex composites entailing a large number of layers. A partial solution to this is some programs' ability to view the composite-order of elements (such as images, effects, or other attributes) with a visual diagram called a flowchart to nest compositions, or "comps," directly into other compositions, thereby adding complexity to the render-order by first compositing layers in the beginning composition, then combining that	24000	frame	173	4152000.00	190.3	4567200

	resultant image with the layered images from the proceeding composition, and so onMR.						
3.86	Technical Architecture Design .It refers to the high level structures of a software system and the discipline of creating such structures and systems. Each structure comprises software elements, relations among them, and properties of both elements and relations. It functions as a blueprint for the system and the developing project, laying out the tasks necessary to be executed by the design teams. It is about making fundamental structural choices which are costly to change once implemented. Software architecture choices include specific structural options from possibilities in the design of software. For example, the systems that controlled the space shuttle launch vehicle had the requirement of being very fast and very reliable. Therefore, an appropriate real-time computing language would need to be chosen. Additionally, to satisfy the need for reliability the choice could be made to have multiple redundant and independently produced copies of the program, and to run these copies on independent hardware while cross-checking results. MR	1	no	702000	702000.00	772200	772200
3.87	Fabrication Design and 3D Visualisation MR This refers to creation of the physical insulation inside of a software program to visualize how its going to look in the real world before the actual onground production MR	1	no	233200	233200.00	256520	256520
3.88	Software Programming MR It is the process of designing and building an executable computer program for accomplishing a specific computing task. Programming will involve tasks such as: analysis, generating algorithms, profiling algorithms' accuracy and resource consumption, and the implementation of algorithms in a chosen programming language (commonly referred to as coding). The source code of a program is written in one or more languages that are intelligible to programmers, rather than machine code, which is directly executed by the central processing unit. The purpose of programming is to find a sequence of instructions that will automate the performance of a task (which can be as complex as an operating system) on a computer, often for solving a given problem. The process of programming thus often requires expertise in several different subjects, including knowledge of the application domain, specialized algorithms, and formal logic. The system splits the media in to two zones , low res for visualisation of the playback in the control room and 4K for the main holographic playback. Also gives turnkey playback system from the control unit. MR	1	no	1686500	1686500.00	1855150	1855150
3.89	Asset Integration MR asset integration refers to the compiling/placing/integration/optimisation of the various elements (graphics/cgi) needed to form the front end of the desired application/installation MR	1	no	135000	135000.00	148500	148500
3.9	Testing / Compilation It is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation. Test techniques include the	1	no	159000	159000.00	174900	174900

	process of executing a program or application with the intent of finding software bugs (errors or other defects), and verifying that the software product is fit for use. MR

4.46	Biamped, coaxial two-way point source loudspeaker with a single 12-15" LF driver and compression driver with 3" or better Voice coil. Frequency Range (-10dB) of 60Hz - 20kHz or better & long term Continuous Power Handling of 300W (Low frequency) and 45W for High Frequency driver or better. The Loudspeaker module shall have a Max. SPL (Peak) of MF/HF>= 131 or better. It should have Horizontal dispersion pattern of 110° or better, vertical dispersion of the loudspeaker shall be 60 degrees or better. The loudspeaker shall be enclosed in a Baltic birch plywood enclosure with perforated steel grille.	2	Nos.	300000	600000.00	330000	660000
4.47	Multipurpose subwoofer with a single 15" neodymium LF driver. Frequency Range (-10dB) of 35Hz - 130Hz or better & long term Continuous Power Handling of 500W or better. It should have an axial Sensitivity of > = 90dB (1W/1m) or more delivering a free field Max. Calculated SPL(peak) of >=124db or better. The loudspeaker should have a nominal impedance of 8 ohm or more. The loudspeaker shall be enclosed in a Baltic birch plywood enclosure with perforated steel grille. Complete with installation as per the site requirement.	2	Nos.	275000	550000.00	302500	605000
4.48	Active Portable loudspeaker system with 2 combo XLR-1/4" inputs, 3.5 mm input, Bluetooth inputs and 1/4" TRS line output with 11 hours of play time using the rechargeable lithium ion battery with Freq Response 62Hz - 17kHz and 109dB peak SPL, 120 H x 50V Nominal coverage.	2	Nos.	125000	250000.00	137500	275000
4.49	Two-way Small Format high SPL IP55 rated (as per IEC 60529) all weather surface mount loudspeaker. The loudspeaker shall meet the following performance criteria: Frequency Range (-10 dB) of 90 Hz - 18 kHz or better; Nominal Dispersion : 100°H x 100°V; Power handling of 400W peak or more; Sensitivity : 90 dB and the Max SPL ; 118dB Peak or better; Nominal impedance of 8 ohms and Integral multi-tap Transformer with selectable tap settings of 10/20/40/80 W@70V & 100V. The loudspeaker system shall be comprised of a Powder-coated finish stainless steel grille with Two-part spray polyurea coating Enclosure; Single 5.25-inch woofer; Single 2-inch voice coil high-frequency compression driver; U bracket shall be included.	2	Nos.	90000	180000.00	99000	198000
4.5	Class D amplifier with 2 x 600 W Load-independent outputs deliver full channel power to either low-impedance (4-8 Ω) or high-impedance (70/100V) loads without bridging .Amplifier shall have frequency response of 20 Hz to 20 kHz (+/- 1 dB) for L2 mode, with THD+N at rated power less than 0.04%.The amplifier shall meet or exceed the following performance specifications: channel separation (crosstalk) greater than 80 dB below rated power at 1 kHz. . The amplifier shall have 2 line-level inputs with selectable input sensitivity settings (-10 dBV, 4 dBu and	2	Nos.	138529	277058.00	152381.9	304763.8

	14 dBu) for balanced line-level inputs (6-pin Euroblock connector) and possibility of 4 or more no. of digital Audio channels . The amplifier shall offer a master mute connection for use with external dry contacts, normally open or normally closed, to mute all outputs of the amplifier.					
4.51	Class D amplifier with 2 x 1000 W Load-independent outputs deliver full channel power to either low-impedance (4-8 Ω) or high-impedance (70/100V) loads without bridging . Amplifier shall have frequency response of 20 Hz to 20 kHz (+/- 1 dB) for L2 mode, with THD+N at rated power less than 0.04%. The amplifier shall meet or exceed the following performance specifications: channel separation (crosstalk) greater than 80 dB below rated power at 1 kHz. . The amplifier shall have 2 line-level inputs with selectable input sensitivity settings (-10 dBV, 4 dBu and 14 dBu) for balanced line-level inputs (6-pin Euroblock connector) and possibility of 4 or more no. of digital Audio channels . The amplifier shall offer a master mute connection for use with external dry contacts, normally open or normally closed, to mute all outputs of the amplifier	1	Nos.	180265	180265.00	198291.5
4.52	Digital Sound Processor with 8 Mic/Line inputs or more & 8 analog outputs or more , 24 Bit A-D and D-A Convertors; Sampling Rate : 48 kHz; THD : < 0.002 % ; Channel Separation (Crosstalk) : < 105 dB ; Frequency Response 20 Hz - 20 kHz ; Signal-to-Noise Ratio 80 dB ,Dynamic Range : > 115 dB; 5 Control Inputs and Outputs; RS-232 and Ethernet Port for third party Control and Monitoring, inbuilt DSP features like Input Equalizers, Router, Band Pass Filter, Output Equalizer, Delay, Limiters, gates , Source selectors etc.	1	No.	284754	284754.00	313229.4
4.53	Networked and programmable controller; Power supply requirement of 15-24 VDC, 300mA; Four rotatory encoders with circular LED rings for managing gain setting or scene selection; Fifth encoder provides control over programmed scenes or presets; Two line by 40 character blacklit LCD provides names of the system elements they are controlling	1	No.	149778	149778.00	164755.8

1.12	Dewatering on BHP basis by using water pump including diversion of stream, providing cofferdams, earthen bunds etc. as may be necessary for foundation and other parts of the works and pumping out water during and after excavation as may be required by using 3.0 BHP pump etc. complete. (prior approval of Superintending Engineer will be necessary)	5040	Hour	250	1260000.00	275	1386000
1.13	Dewatering on BHP basis by using water pump including diversion of stream, providing cofferdams, earthen bunds etc. as may be necessary for foundation and other parts of the works and pumping out water during and after excavation as may be required by using 5.0 to 9.0 BHP pump etc. complete. (prior approval of Superintending Engineer will be necessary)	1890	Hour	250	472500.00	275	519750
1.14	Providing dry/ trap/ granite/ quartzite/ gneiss rubble stone soling 15 cm to 20 cm thick including hand packing and compacting etc. complete SSR 21.38 / 201	245.7	Cum	3240	796068.00	3564	875674.8
1.15	Providing and laying Cast in situ/Ready Mix cement concrete in M20 of trap/ granite/ quartzite/gneiss metal for bed blocks, foundation blocks and such other items including bailing out water, Steel centering, formwork, laying/ pumping, compacting, roughening them if special finish is to be provided, finishing uneven and honey combed surface and curing etc. complete. The Cement Mortar 1:3 plaster is considered for rendering uneven and honeycombed surface only Newly laid concrete shall be covered by gunny bag, plastic, tarpaulin etc. (Wooden centering will not be allowed), with fully automatic micro processor based PLC with SCADA enabled reversible Drum Type mixer/ concrete Batch mix plant (Pan mixer) etc. complete With fine aggregate (Natural Sand / Crushed sand VSI Grade finely washed etc) (PCC) SSR 24.10 / 227	81.90	Cum	17000	1392300.00	18700	1531530
1.16	Filling in plinth and floors with contractors material/brought from outside and approved by Engineer in layers of 15 cm to 20 cm including watering and compaction etc. complete. SSR 21.37 / 201	1050.00	Cum	150	157500.00	165	173250
1.17	Filling in plinth and floors with approved excavated material in 15cm. to 20cm. layers including watering and compacting etc. complete. SSR 21.36/195	1050.00	Cum	2450	2572500.00	2695	2829750

1.18	Providing and laying Cast in situ/Ready Mix cement concrete M-30 of trap / granite /quartzite/ gneiss metal for R.C.C. work in foundations like raft, strip foundations, grillage and footings of R.C.C columns and steel stanchion etc. columns as per detailed designs and drawing or as directed including Steel centering formwork, cover blocks laying/pumping, compaction finishing the formed surface with cement mortar 1:3 of sufficient minimum thickness to give a smooth and even surface or roughening if special finish is to be provided and curing etc. complete. (Excluding reinforcement and structural steel). with fully automatic micro processor based PLC with SCADA enabled reversible Drum Type mixer/ concrete Batch mix plant (Pan mixer) etc. complete. With fine aggregate (Natural Sand / Crushed sand VSI Grade finely washed etc) SSR 25.15/231	136.50	Cum	19500	2661750.00	21450	2927925
1.19	Providing and laying Cast in situ/Ready Mix cement concrete in M-25 of trap/ granite/ quartzite/ gneiss metal for R.C.C. pards of required thickness including steel centering, formwork, cover blocks, laying/pumping, compacting and roughening them if special finish is to be provided and curing complete. (Excluding reinforcement and structural steel). with fully automatic micro processor based PLC with SCADA enabled reversible Drum Type mixer/ concrete Batch mix plant (Pan mixer) etc. complete. With fine aggregate (Natural Sand / Crushed sand VSI Grade finely washed etc)	191.1	Cum	24500	4681950.00	26950	5150145
1.2	Providing and laying Cast in situ/Ready Mix cement concrete M-30 of trap / granite /quartzite/ gneiss metal for R.C.C. beams and lintels as per detailed designs and drawings or as directed including steel centering, formwork, cover blocks, laying/ pumping, compactionand roughening the surface if special finish is to be provided and curing etc. complete. (Excluding reinforcement and structural steel) with fully automatic micro processor based PLC with SCADA enabled reversible Drum Type mixer/ concrete Batch mix plant (Pan mixer) etc. complete. With fine aggregate (Natural Sand / Crushed sand VSI Grade finely washed etc)	27.05	CUM	24500	662725.00	26950	728997.5
1.21	Providing and laying Cast in situ/Ready Mix cement concrete M-30 of trap/ granite/ quartzite/ gneiss metal for R.C.C. slabs and landings as per detailed designs and drawings including steel centering, formwork, cover blocks, laying/pumping, compaction finishing the formed surfaces with cement mortar 1:3 of sufficient minimum thickness to give a smooth and even surface or roughening if special finish is to be provided and curing etc. complete,(Excluding reinforcement and structural steel). with fully automatic micro processor based PLC with SCADA enabled reversible Drum Type mixer/ concrete Batch mix plant (Pan mixer) etc. complete. With fine aggregate (Natural Sand / Crushed sand VSI Grade finely washed etc) SSR 25.74 / 237	109.20	Cum	24500	2675400.00	26950	2942940
1.22	Providing and fixing in position TMT - FE - 500 bar reinforcement of various diameters for R.C.C. pile caps, footings, foundations, slabs, beams columns, canopies, staircase, newels, chajjas, lintels pardis, copings, fins, arches etc. as per detailed designs, drawings and schedules including cutting, bending, hooking the bars, binding with wires or tack welding and supporting as required complete. SSR 26.33 / 245	139.15	MT	105000	14610750.00	156200	21735230
1.23	Providing and applying Anti corrouvve treatment to reinforcement as per cement polymer composite coating (C.P.C.C.) method developed by C.E.C.R.I including cleaning the bar by means of any established mechanical or manual method for removing rust and	139.1544	MT	5500	765349.20	13036.1	1814030.67

	deleterious material, applying rapid setting primer and cement polymer sealing coat of approved and licensed by CECR, including redoing the process if damage occurs during handling, stacking etc. complete. (With prior approval of SE)						
1.24	Providing filling of Micro-concrete and 10mm aggregate (1:1) including sacrificial leak proof MS shuttering includes the cost of hire charges of all machineries, barge, boat, cost of all tools and all labour charges etc., complete.	1.68	Cum	320000	537600.00	352000	591360
1.25	Providing and laying weep holes of 100 mm diameter PVC pipes as per drawing for abutment returns, return walls etc. Complete.	302.4	Running Meter	560	169344.00	616	186278.4
1.26	Providing and laying of filter media with granular materials/ stone crushed aggregates satisfying the requirements laid down in clause 2504.2.2 of MoRTH specifications to a thickness of not less than 600 mm with smaller size towards the soil and bigger size towards the wall and provided over the entire surface behind abutment, wing wall and return wall to the full height compacted to a firm condition as per drawing and technical specifications etc. complete.	245.7	cum	4000	982800.00	4400	1081080
1.27	Providing and fixing in position steel fibre reinforced concrete (SFRC) frame and covers of approved make including, 0.90 x 0.60 m in size loading, unloading, transportation, all taxes etc. complete as directed by Engineer-in-charge (20 tonnes capacity)	42	Nos	14200	596400.00	15620	656040
1.28	Providing and laying concrete pipes of LS.NP. class of 150mm diameter in proper line, level and slope including necessary collars, excavation, laying, fixing with collars in cement mortar 1-1 and refilling the trench complete.	21	Running Metre	1250	26250.00	1375	28875
1.29	Providing and laying concrete pipes of LS.NP. class of 225mm diameter in proper line, level and slope including necessary collars, excavation, laying, fixing with collars in cement mortar 1-1 and refilling the trench complete.	21	Running Metre	1450	30450.00	1595	33495
1.30	Providing and laying concrete pipes of LS.NP. class of 300mm diameter in proper line, level and slope including necessary collars, excavation, laying, fixing with collars in cement mortar 1-1 and refilling the trench complete.	21	Running Metre	1450	30450.00	1595	33495
1.31	Providing and casting in situ or precast tapering R.C.C. M-20 Barrier type Kerb without gutter (as per IRC861983) embedded 125mm below ground level over M-10 PCC finished neatly with C.M.1-2, setting the same in C.M.1-2, including the required excavation in any strata and removing the excavated stuff anywhere in city and redoing the surface as specified and directed by Engineering In-charge. Using Concrete Batching and Mixing Plant	136.5	Cubic Metre	27500	3753750.00	30250	4129125
1.32	Providing and Fixing Processed Stone Cladding on wall surface /plywood surface, RCC pardi /Wall and all type of Interior, Exterior Compound wall and Gate etc. of cladding processed stone with material of Processed clay, Wooden chips, Silica sand, Cement, GFRC admixtures, Colour pigments, Fiber up to thick of 20mm/ 25mm including scaffolding, fixing of screw, etc. (As directed by Engineer in Charge)	2012	Sqm	11500	23138000.00	12650	25451800
1.33	Extra for providing additional thickness of brickbats over 100 mm in 1.5 c.s. either due to location of rain water pipes or due to increase in the travel length of flow of rain water or brick bats required in the sunk portion of baths, W.C.s nahani etc. The rate includes for fixing brickbats in C.M., with waterproofing compound as per specification as directed.	413	Cum.	15500	6401500.00	17050	7041650
1.34	Providing and applying one pack bonding coat between concrete members like RCC slabs, columns, beams, chajjas, pardi set and cement mortar plaster using Bonding Agent of approved make & approved by Engineer in charge. Clean the concrete surface thoroughly	573	Sqm	325	186225.00	357.5	204847.5

	to remove dust, dirt, grime, desutting oils and rub down to a clean surface. Apply Bonding agent of approved make & approved by Engineer in charge by spray on the entire concrete surface. Provide a lean cement-sand dash coat over the same. Allow the dash coat to set for around 24 hours. Further plastering as per specifications						
1.35	Providing and fixing polished natural stone tiles as specified below of approved quality, pattern and colour for dado including preparing the surface and levelling in the desired line, backing of 20 tk. cement mortar in proportion 1:3, square cut top edge or chamfered top edge, grooving, moulding etc in cement mortar 1:3, cement float, machine cutting, leveling, jointing, filling the joints with neat cement or pigment mixed with cement, polishing, finishing, curing etc complete as directed by Engineer In Charge (Gang saw Granite or Equivalent)	462	Sqm	9650	4458300.00	10615	4904130
1.36	Providing & Fixing in position, Carpet more than 1200 gsm, made with 100% stain proof fibres of approved make along with 5mm underlay as per Architectural & Acoustical Design & Instructions & Complete in all aspects including all materials labour,finishing etc complete	1247	Sqm	4450	5549150.00	4895	6104065
1.37	Providing leather finished polishing to Granite Stone slab by continuous grinding in 4 coats of different bits to receive rough and matt finish including buffing process before laying and fixing of stone as per drawing and design, including cleaning, washing and finishing etc. complete	1250.00	Sqm	756	945000.00	831.6	1039500
1.38	Providing wax polishing to floors and dado, preparing the surface, scaffolding etc. complete	2950.00	Sqm	463	1365850.00	509.3	1502435
1.39	Providing Mirror polishing to Kota Stone including using all necessary stones and equipments cleaning, washing etc. complete. For Flooring	503.00	Sqm	156	78468.00	171.6	86314.8
1.4	Providing Mirror polishing to Kota Stone including using all necessary stones and equipments cleaning, washing etc. complete. For Skirting	98.00	Rmt	83	8134.00	91.3	8947.4
1.41	Rounding the edge in half round shape of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge a) Kota stone	138.00	Rmt	150	20700.00	165	22770
1.42	Rounding the edge in half round shape of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge c) Any type of Granite stone	500.00	Rmt	210	105000.00	231	115500
1.43	Chamfering the edge of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge a) Kota stone	500	Rmt	120	60000.00	132	66000
1.44	Chamfering the edge of the stone work specified below including high gloss machine polishing as directed by Engineer In Charge c) Any type of Granite stone	500	Rmt	190	95000.00	209	104500
1.45	Providing & making 5mm gap in flooring & dado by using Spacer and gap to be filled with epoxy polymer based grout of Bal Endura make to match the colour & shade of flooring tiles as per instruction of Engg. In charge etc complete	1823.096 165	SMT	750	1367322.12	825	1504054.336
1.46	Providing and fabricating structural steel work in rolled sections like joists, channels, angles, tees etc. as per detailed design and drawings or as directed including cutting, fabricating, hoisting, erecting, fixing in position making riveted / bolted /welded connections without connecting plates, braces etc. and including one coat of epoxy paint and over it two coats of oil painting of approved quality and shade etc. complete	15.95	MT	345000	5502750.00	379500	6053025
1.47	Providing and fixing double scaffolding system (cup lock type) on the exterior side of building/ structure, including additional rows of scaffolding in stepped manner as	94114	Sqm	650	61174100.00	715	67291510

	perequirement of site, made with 40mmdiaM.S. tube, placed 1.5metre centre to centre, horizontal & vertical tubes joint with cup & lock system with M.S. Tubes, M.S. tube chalis, M.S. clamps and staircase system in the scaffolding for working platform etc. and maintaining it in a serviceable condition for execution of work of cleaning and/ or pointing and/ or applying chemical and removing it there after. The scaffolding system shall best if fened with bracings, runners, connecting with the building etc, wherever required, if feasible, for inspection of work at required locations with essential safety features for the work men etc., complete as per directions and approval of Engineer-in-charge.						
1.48	Providing & fixing in position 35 mm thick 1st quality water proof Single Leaf Flush Door for w.c. with 1mm thick laminate on both sides with 12x35mm lipping patti on all edges. Rate is Inclusive of s.s fixtures & fittings, such as handles on both sides, tower bolts, locking arrangement., door stopper of make (Dorna, Geze, Hafle) 450 x 150mm aluminum ventilation grill powder coated, as per architect's detailed drg and design etc complete	41	Sqm	28500	1168500.00	31350	1285350
1.49	Single Leaf Flush Door Providing and fixing of single leaf flush door with, shutter to be made of 35 mm thick marine grade block board core with teak wood lipping patti & 1 mm thick approved decorative laminate finish on both faces. All exposed T.W. surfaces to be painted in 2 coats of flat enamel paint of approved shade over 1 coat of primer of approved make including preparation of surface. All surfaces of frame, in contact with brick masonry or concrete should be tar painted. (Black Japan). All other necessary fittings and fastenings to be of chrome finish brass. (Unless otherwise mentioned in the drawing)	26	Sqm	28500	741000.00	31350	815100
1.5	Fire rated Double leaf Door - Laminate Finish: Providing & Fixing of Wooden Fire door without Panic Bar of approved make and of required size, 120 minutes fire rating, integrity and insulation in accordance with the criteria of BS 476 ; Part 22 : 1987 and report 212 (1)FR/2003, Insulation on door leaf only. Tested at Fire Research Laboratory, Central Building Research Institute, Roorkee with standard heating conditions as specified in IS : 3809-1979 and BS : 476 part 20 & 22, 1987 to achieve the required integrity & insulation (i.e. to restrict the heat radiation, temperature rise on the non fire side to the maximum of 140 degree Centigrade above the ambient temperature on the unexposed surface of the shutter). Red Mirranti Hard wood frame of section 145mm x 70mm with Intumescent strip (imported) to take care of Hot and cold smoke of size 10mm x 2mm x 2Nos. Concealed in the grove of the frame and 55mm thick single leaf shutter made out of perimeter railing of Red Mirranti wood of size 100mm x 29mm and primina 60.9mm thick Calcium Silicate Board Fire Retardant compound on each side coated with Intumescent sealant and faced with 4mm thick marine ply with Fire and smoke Intumescent Seal of size 20mm x 2mm x 1 No., mounted in the grooves in the shutter on all sides except bottom with 10mm thick Hardwood beading on all side. The Fire Doors with frame will be as per IS: 3614 part 2 and BS: 476 part 20 at FRL CBRI Roorkee with standard heating conditions as specified in IS: 3809 - 1979 and BS: 476 part 20 & 22 1987. The door shall be finished with 1 mm thick fire retardant laminate on both side etc., with approved Stainless steel fittings & Fixtures all complete to the entire specification as per Architect's Instruction FRD -2 SIZE- 1.250 x 2.350m as Directed by Engineer incharge.	12	Sqm	45000	540000.00	49500	594000

1.51	Providing and fixing ISI marked double swing flush door shutters conforming to IS :2202 (Part I) Non-decorative type, core of block board construction with frame of 1st class hard wood and well matched teak 3 ply veneering with vertical grains or cross bands and face veneers on both faces of shutters. 30 mm thick including ISI marked Stainless Steel L-hinges with necessary screws Fittings & Fixtures per leaf SS kick plates on both sides of the door of 300mm height Heavy Duty satin finish butt SS Hinges (100mm x 75mm x 3mm in size) -4 nos. SS finished lever handle with mortise lock- 1 One Number Floor spring- 1 One Number 100mm x 100mm safety glass at the specified location	3.168	Sqm	13125	41580.00	14437.5	45738
1.52	Supply, installation, testing and commissioning of extruded aluminium powder coated linear 8" Grilles for Supply /Return grill without volume control dampers.	2.86	SMT	11752	33618.72	12927.2	36971.792
1.53	Supply & Installation laminate 1mm thk both side laminate hydraulic pressed by machine make century virgo Or Equivalent as directed by Engineer in charge etc completed	161.57	SMT	3400	549338.00	3740	604271.8
1.54	Supply & Installation SS ball bearing butt hinges 5" each door make (DORMA,GEZE,Hafle) as directed by Engineer in charge etc completed	136	nos	542	73712.00	596.2	81083.2
1.55	Supply & Installation Surface mounted door closer With standard arm size 2 each door make (DORMA,GEZE,Hafle) as directed by Engineer in charge etc completed	34.00	nos	4902	166668.00	5392.2	183334.8
1.56	Supply & Installation Pull handle back to back fixing each door make (DORMA,GEZE,Hafle) as directed by Engineer in charge etc completed	68.00	nos	1806	122808.00	1986.6	135088.8
1.57	Supply & Installation autodrop seal each door make (DORMA,GEZE,Hafle) as directed by Engineer in charge etc completed	34	nos	4730	160820.00	5203	176902
1.58	Supply & Installation mortise Cylinder dead lock back, set,24mm foreend With Euro profile double cylinder keyed Diff.Door lock 1 each door make (DORMA,GEZE,Hafle) as directed by Engineer in charge etc completed	17	nos	3223	54791.00	3545.3	60270.1
1.59	Supply & Installation 10mm thk rod SS tower bolt 4 each door make (DORMA,GEZE,Hafle) as directed by Engineer in charge etc completed	68	nos	671	45628.00	738.1	50190.8
1.60	Making holes in 75 mm to 200 mm brick/concrete/rubble walls for drainage pipes, fittings, etc. and making good the same in cement mortar 1:3 or cement concrete 1:2.4 & finishing on both sides with cement plaster and 3 coats of white or colour wash as directed by Engineer in charge etc. complete	100	Nos	2838	283800.00	3121.8	312180
1.61	providing and fixing RCC CHAMBER COVER 900*450 size capacity 10MT /Sqm as per instruction by engineer incharge	30	Nos	17500	525000.00	19250	577500
1.62	Compacting the hard murum side widths including laying in layers on each side with power roller including artificial watering etc. complete	27060.00	Sqm	50	1353000.00	55	1488300
1.63	Providing and laying wedge shear elemental layer (WSEL) by using rubble stone of size 15 to 20 cm thick in single layer of 230 mm including packing the same with 20 mm to 40 mm thick aggregates (normal size) and using stone powder of 40 mm to 50 mm thick on surface and watering & compacting by vibratory roller confirming layer thickness of minimum 200 mm and as directed by Engineer - in - charge etc complete	2706.00	Cum	4000	10824000.00	4400	11906400
1.64	Providing, laying, spreading and compacting stone aggregates of specific sizes to water bound macadam specification including spreading in uniform thickness, hand packing to proper grade and camber, applying and brooming requisite type of screening/ binding Materials to fill up the interstices of coarse aggregate, watering and compacting with Intelligent Compactor with compaction analyzer and VSat attachment to the required density. By Manual Means Grading II (Using Screening Type B (11.2 mm) Aggregate)	676.50	Cum	6500	4397250.00	7150	4836975

1.65	Providing and Laying M60 grade cement concrete of approved mix design with avg. Flexural strength of 4.4 MPa in 3 days from R.M.C. plant incl. use of micro-silica/alcofine, approved make super plastiser and retarder, fibrillated 100% virgin polypropylene fibres, fly ash and transported by transit mixer and placing at work site. Compacting, finishing, initial curing by approved curing compound/ contractors water and tarring the sides of slab with hot bitumen as specified and as directed (w/c ratio 0.28 max.). (vatta for curing will be paid separately) for Ultra thin White Topping (UTWT) pavement etc completed.	677.00	Cum	18500	12524500.00	26950	18245150
1.66	Green Cutting of construction & dummy joints of concrete grade M 40 and above (UTWT) pavement by mechanical means within 10 to 12 hrs after casting of bay / slab upto 1/3 rd depth of pavement and 5 to 6 mm wide as directed	19000.00	Rmt	160	3040000.00	176	3344000
1.67	Providing and Placing 5mm thick Thermocole in dummy and construction joints immediately after cutting of joints and removing the same before dressing of dummy and construction joint as directed	19000.00	Rmt	99	1710000.00	99	1881000
1.68	Providing and construction of cement vatta in C.M. I:10 at 0.6 M X 0.6 M c/c admeasuring 0.09 meter at bottom, 0.04 m at top and 0.075 m deep and maintaining the same throughout 7 days curing period and removing the same material as directed.	4510.00	Sqm	194	469040.00	114.4	515944
1.69	Sealing of M-35 & above new C.C. pavement dummy, transverse, longitudinal joints with hot rubberised sealing compound conforming to IS 1834-1984 after proper cleaning with compressed air, applying required primer & providing a layer of lime powder over hot sealing compound as directed. Sealing 5mm - 6 mm wide & avg. depth of 40 mm transverse & longitudinal joints	19000.00	Rmt	101	1919000.00	111.1	2110900
1.7	Providing and laying of hot applied thermoplastic compound 2.5mm thick White /Yellow including reflectorising glass beads @250 gms per sqm area, thickness of 2.5mm is exclusive of surface applied glass bead as per IBC 35. The finished surface to be level, uniform and free from streaks and holes etc complete with 3 years guarantee	50.00	Sqm	1049	52450.00	1153.9	57695
1.71	Providing and fixing Speed Breakers of Size 350 W x 500 L x 50 H mm yellow black color as shown in the drawing with necessary fittings & fixtures as directed by EIC.	50	Rmt	5083	254150.00	5591.3	279565
1.72	Supplying and Fixing of Molded Shank Raised Pavement Markers / Cat's Eye made of polycarbonate and ABS moulded body and reflective panels with microprismatic lens capable of providing total internal reflection of the light entering the lens face and shall support a load of 16000 kg tested in accordance to ASTM D4280 Type Hand complying to Specifications of Category A of MORTH Circular No RW/NH/33023/10-97DODIII Dt 11.06.1997. The height, width and length shall not exceed 50mm, 100mm and 102+/-2 mm and with minimum reflective area of 13 Sqcm one each side and the slope to the base shall be 35+/- degree. The strength of detachment of the integrated cylindrical shanks , (of diameter not less than 19+/-2mm and height not less than 30+/-2mm) from the body is to be a minimum value of 500Kg. Fixing will be by drilling holes on the road for the shanks to go inside, without nails and using epoxy resin based adhesive as per manufacturer's recommendation and complete as directed by the engineer. The contractor shall submit a two year warranty for satisfactory field performance including stipulated retro-reflectance of the reflecting panel, to the Engineer.	50	Nos	1176	58800.00	1293.6	64680
1.73	Design, supply & installation of 4 mm thick Aluminium Composite Panels (ACP) of Alcopla make or other equivalent approved make, material consisting of 3mm thick FR	6034	Sqm	12600	76028400.00	13860	83631240

	grade mineral core sandwiched between two aluminium sheets (each 0.5 mm thick). The fixing will be done fabrication comparious Durol or other equivavalent company Backup MS GJ frame work, & aluminium frame along with backer rod, Dow corning Silicon sealant etc complete as directed by the engineer. The rates should include provide design alongwith shop drawings and getting approval from consultant ACP CLADDING						
1.74	Fire Sealant For Pipe And Duct Holes And Any Other Supplying, Loading, Unloading, Installations, Testing , Commissioning of fire resistant mortar (20 kg) with fire resistance class S90 as per National Electrical Code (NEC) SP30-2011 suitable to seal the openings with all kinds of cables, pipes and cable support system in steel and aluminium and plastic profiles (Except hollow core conductors). The residual openings shall be closed with filler, as Directed by Engineer Incharge.	10	Cum	18828	188280.00	20710.8	207108
1.75	Providing and Fixing of GI Lay in Plain metal ceiling consisting of 600x600mm Lay in tiles of pre coated galvanized steel in 0.5 mm thickness in Global white color tile to be laid on grid systems with 15mm wide T - section flanges color white having rotary stitching on the Main Runner, 1200 mm and 600 mm Cross Tees. Providing and Fixing of GI Lay in Plain metal ceiling consisting of 600x600mm Lay in tiles of pre coated galvanized steel in 0.5 mm thickness in Global white color tile to be laid on grid systems with 15mm wide T - section flanges color white having rotary stitching on the Main Runner, 1200 mm and 600 mm Cross Tees products approved as per GRIHA and BS 476 etc. complete.	149	Sqm	4000	596000.00	4400	655600
1.76	Providing & Fixing Sliding window systems are manufactured from Rigid Thermo Vinyl Polymer (RTVP) Profiles suitable for tropical development. The profile are with multichambered construction. The nominal thickness of outer wall is 2 MM. The outer frame size is 105 x 52 mm. Roller shutter frame 60 x 27 mm & Handle shutter frame 52 x 30mm. Glass panels used in window system shall be of 6mm thick clear float glass manufactured by Modiguard/Saint Gobin/Asahi or any other approved equivalent. The window systems are prefabricated in factory. All the corners of outer frame & shutter are fusion welded under pressure to a pre-determined temp & time ,as per the specification & design. The structural reinforcement chambers are not exposed to any drainage routing. The steel reinforcements are 1.5mm thk hot dip galvanised & passivated for corrosion resistance & tropical development. Sliding track is made of UPVC profile, which is the part of outer frame for smooth movement of shutter. Sliding roller assembly consist of Nylon Roller & Zinc Alloy casting. body Mosquite frame is part of the sliding outer frame Gaskets are made of Ethylene Propylene Dieneomer (EPDM) which has good weathering properties & resistance to tear & decay to OZONE & U.V exposure as per manufacturers specification as directed by Engineer in Charge etc. complete as Directed by Engineer Incharge.	19	Sqm	14000	266000.00	15400	292600
1.77	Providing and fixing SS Mosquito mesh in anodised (anodic film must not be less than 15 microns i.e. AC-15 as per IS, the anodising must be sealed by keeping the anodized section in boiling de-anodized water for a period of one hour) aluminium shutter fixed in sliding / openable / fixed windows conforming to IS:1948-1961 as per drawing and directed by Engineer In Charge (Note: For Aluminum Sections, total weight shall be upto 3.5 kg/sq m.)	8	SQM	2600	20800.00	2860	22880

1.78	<p>SITC of Elevio Automatic Elevator with- Rated capacity :- 20 Passenger/1360Kg - Floors - G+1 floor (2Stops/2 Landings) - Travel - 4.5 mtrs - Location of Lift Machine- MRL - Rated speed - 1.0mps VS - Car/Landing door clear opening of 1000 mm wide x 2000 mm high - Clear Car size of 2000mm wide x 1550mm deep x 2200mm high - Lift shaft available having clear size of 2940mm wide x 3440mm deep, 1550mm Pit depth, 4250mm Overhead.-CAR DOOR of Two Panel center opening auto door material- SS304 Stainless Steel in Hairline Finish [SSH1]. FLOORING-SS Chequered Plate. False Ceiling-Stainless Steel LLIGHT & FAN-LED Light & Axial Flow Fan. C.O.P-- Illuminated Buttons with Colour LCD Display for Direction & Position Indicator. MAIN POWER SYSTEM-415 Volts, 3Phase, 50Hz A.C AUXILIARY SUPPLY SYSTEM-220/230 Volts, Single Phase, 50Hz A.C OPERATION- Simplex Full Collective System without attendant REQUIRED DRIVE-ACVVVF Advantages of CANBUS Controller, Three way Intercom,Car Ventilation, Battery Operated Emergency Alarm Bell & Light,Firemans Switch at main lobby,Overload Warning Indicator, Automatic Rescue Device (ARD),Full Curtain Infrared Door Safety,Machine Beam (ISMB),Floor Announcement System with Soft Music,Anti-nuisance,Car call Cancellation, Full Load Automatic Bypass,Direct Landing, Anti-stall timer Protection,Start Protection Control,Automatic power Light & Fan off Including required scaffolding & structural steel braces for erecting lift as per above specification obtaining required all necessary permissions of Lift inspector (PWD) to erect and complete the elevator work,Lissons to operate the elevators including all necessary charges payments for the same etc complete.</p>	1	Job	4500000	4500000.00	4950000	4950000

1.8	Providing & fixing European type white glazed earthenware water closet of potteryware,Hindware or equivalent MAKE,wall hung closet to be used with cistern as per Model No. 89334 with size (H X W X P) 51cm x 35cm x76cm pan including 'P' or 'S' trap with white bakelite including C.I. soil & vent pipes upto the outside Market Ratee of the wall and 100 mm dia. C.I. Plug bend, and flush bend and inlet pipe with brackets for fixing the cistern 40 mm dia. G.I. overflow pipe, painting of the exposed pipes and cutting and making good and floors as directed by architect &Engineer-In-Charge etc complete	21	Nos	23753	498813.00	26128.3	548694.3
1.81	Providing and fixing C.P.Two way Bib cock potteryware make or equivalent Quattro collection (CAT.NO. T2334A1) including necessary sockets/union nut etc. complete.	26	Nos	3729	96954.00	4101.9	106649.4
1.82	Providing and fixing C.P.Auto Closing concealed urinal flush valve potteryware make or equivalent lapis collection (CAT.NO. G2030A1) including necessary sockets/union nut etc. complete.	13	Nos	2973	38649.00	3270.3	42513.9
1.83	Providing and fixing C.P.Auto Closing concealed WC Dual flush valve potteryware make or equivalent (CAT.NO. T3305A1/T3307A1) including necessary sockets/union nut etc. complete.	26	Nos	5509	143234.00	6059.9	157557.4
1.84	Providing and fixing 15 mm diameter PVC Aqua kraft type potteryware make or equivalent make super jet spray with flange 2 in 1 faucet 1.50 metre long including all accessories etc complete	26	Nos	1781	46306.00	1959.1	50936.6
1.85	Providing & Fixing 46 x 30cm. Size of white glazed vitreous chinaware Square shape wash Basin of potteryware,Hindware or equivalent MAKE, Model No. 895V wash basin Square overcounter including cold water concealed pillar taps, brackets, rubber plugs and brass chain, stop tap, chromium plate bottle trap and necessary pipe connections including UPAC waste pipe and trap upto the outside face of the wall, painted with two coats of white enamel paint over a coat of white enamel paint over a coat of anticorrosive primer, 32mm dia. PVC inlet connection etc. complete (32 mm dia. G.I. waste pipe is measured and will be paid separately) Rate to include making necessary connection to Nahani trap / waste as directed by architect &Engineer-In-Charge etc complete	22	Nos	17104	376288.00	18814.4	413916.8
1.86	Providing and fixing white vitreous urinal basin of potteryware,Hindware or equivalent MAKE , Series white Model No. 0580 with standard flush pipe and C.P. brass spreaders with brass unions and G.I clamps complete, including painting of fittings and brackets, cutting and making good the walls and floors wherever required as directed by architect & Engineer-In-Charge etc complete	13	Nos	25000	325000.00	12289.2	139759.6
1.87	Providing and fixing C.P. wall mixer with provision for overhead shower with 115mm long bend pipe and wall flange jaguar or equivalent make continental (CAT.NO. T2316A1) including necessary sockets/union nut etc. complete	1	Nos	25000	25000.00	12866.7	12866.7
1.88	Providing and fixing SS 304 Towel rail (24") potteryware, hindware or equivalent make including all fitting etc completed	1	Nos	1700	1700.00	1494.9	1494.9
1.89	Providing and fixing SS 304 Soap dish potteryware, hindware or equivalent make including all fitting etc completed	3	Nos	1089	3267.00	1197.9	3593.7
1.9	Providing and fixing SS 304 Toilet paper holder potteryware, hindware or equivalent make including all fitting etc completed	26	Nos	2500	65000.00	1818.3	47275.8
1.91	Providing and fixing SS 304 Towel ring potteryware, hindware or equivalent make including all fitting etc completed	26	Nos	1250	32500.00	1057.1	27484.6
1.92	Providing and fixing SS 304 Twin robe hook potteryware, hindware or equivalent make including all fitting etc completed	26	Nos	1250	32500.00	649	16874

1.93	Providing and fixing SS 304 Soap dispenser perryware, hardware or equivalent make including all fitting etc completed	22	Nos	2500	55000.00	2241.8	49319.6
1.94	Providing & fixing of HM-MCP Call Point are an addressable manual break glass call point, simple rotary decade, switch at the rear of the unit for addressing, analogue addressable communications, Integral LED, EN54 approved. Make :- Honeywell Morley Model No. :- HM-MCP-FLEX	4	NOS	6803	27212.00	7483.3	29933.2
1.95	Providing & fixing of The Wall Mount sounder strobe integrates a 32 tone sounder and high quality strobe into one device. It is powered by the fire panel via the loop wiring. Control of the device is enabled using on-board switches, some of which can also be adjusted through SS Advanced Protocol. The device is installed simply by a twist fit onto the B501AP base Supply Voltage: 15 to 29VDC (Non-isolation) 15 to 29VDC (Isolation) Standby Current: 120µA (Non-Isolation) 225µA (Isolation) Max current consumption sounder and strobe: 14.5mA (High Volume Tone 11 @15V) Max Sound Output 97dB(A) +/-3dB @1metre (High Volume, Tone 8 @24V) [Tone Dependant - Figure stated is based on high volume 97dB continuous @24VDC] Make :- Honeywell Morley Model No. :- WSD-PR	7	NOS	10285	71435.00	11225.3	78578.3
1.96	Providing & fixing of addressable four-loop, fire detection system supports Morley protocol. It comes with two sounder circuits (1A max), a 2A power source, a general relay (Alarm and Fault), one programmable relay, a fixed auxiliary output and resettable 24V 250mA output, two keys and two inputs for programmable functions. It also includes a 6 * 40 LCD graphic display, an integrated USB port for PC programming and an RS485 port for repeaters. Total Loop Capacity (396 Detector +396 Devices) Networking up to 16 loops 6x40 characters, blue liquid crystal display with backlight illumination Configuration by keypad and PC 160 Fire Zones Fire, Fault and Auxiliary relays Loop-Battery calculator for reliable system design 7 day timer Onboard diagnostic EN54-2, EN54-4 LPCB approved Optional: 40, 80 or 160 zone alarm LEDs Make :- Honeywell Morley Model No. :- DX4C	1	NOS	417094	417094.00	458803.4	458803.4
1.97	SITC of 1100 V grade XLPE insulated sheathed & steel armoured copper Conductor cables. Unloading by crane, shifting to place of work and laid on walls / ceiling / ready made trench / Cable tray / Through underground RCC pipes / including spacers / saddles / clamps / G.I. Hardware as required, (M.S. cable trays supports / cable trays, RCC pipes covered by separate items) with Termination of cable using screwed flange type elliptical / conical, heavy duty brass glands, crimping sockets including 2 C X 1.5 Sq. mm A X F Y XLPE	850	RM	211	179350.00	232.1	197285
1.98	Providing & fixing of HM Series Advanced Intelligent Thermal Sensors are plug-in type fire sensors that use a single thermistor sensing circuit to provide early warning of developing fires, together with addressable communication with the fire panel. The HM-RHSE, HM-RHSE-I provides fixed 58°C and rate-of-rise (10°C / minute) temperature sensing (Class A1R). The HM-FHSE, HM-FHSE-I provides fixed 58°C temperature sensing (Class A1S). 15 to 32Vdc260µA at 24Vdc (no communications) 310µA at 24Vdc (LED blink enabled, once every 5s) 0.5mA at 24VdcREMOTE OUTPUT VOLTAGE REMOTE OUTPUT	5	NOS	6803	34015.00	7483.3	37416.5

2.18	Providing & Fixing of non intelligent Power distribution unit with 6 indian standar sockets (6/15Amp), 16A modular MCB, surge & over voltage protection, Fuse protection, 3 Mtr. Long power cable, Black in colour.	2	NOS	19710	39420.00	21681	43362
2.19	Providing & Fixing Of 9u(550w X 5000 D)Mm Floor Mount Closed Rack With Vertical Cable Management For Cable, Front Glass Door, Rear Perforated Door With Standard Accessories & 2 Nos. Vertical Power Strip.	3	NOS	35961	107883.00	39557.1	118671.3
2.20	Supplying and installing FR PVC sheathed HDPE insulated copper cat-6 cable suitable for networking compliant with ANSI/TIA-568.2-D standards in provided conduit/casing-n-capping	4660	RM	214	997240.00	235.4	1096964
2.21	Supplying and fixing 1 m 24 AWG multi stranded UTP patch cord with RJ-45 factory crimped connector of Cat 6 type, compliant ANSI/TIA-568.2-D standards in position	1	NOS	909	909.00	999.9	999.9
2.22	Supplying and erecting 12 fibers LSZH armoured multimode optical fiber cable with , core dia 50/125 μ m (OM3), suitable upto 10 GBPS, compliant to IEC 60793/IEC 60794 standards, on wall/ceiling or laid in provided pipe/trench	10	RM	1181	11810.00	1299.1	12991
2.23	Supplying and fixing SC/SC type multimode pigtauls (OM3) for LIU to terminate OFC in LIU	1	NOS	3187	3187.00	3505.7	3505.7
2.24	Supply, Installation, Testing & Commissioning of Under deck Insulation Underdeck Insulation With 19MM Thick "thermal nitril rubber with 36G Aluminium Foil	1092	Sqm	1400	1528800.00	1540	1681680
2.25	Providing and fixing trap door in the Gypsum board / POP ceiling system for electrical and mecanical utilities with 18mm thk. plywood shutter and 12mm thk. teak wood lipping all around including wooden / G.L. frame with supports, fixtures, fastenings etc, complete as directed	180	Sqm	7559	1360620.00	8314.9	1496682
2.26	Providing and fixing aluminium powder coated trap door as per required size for AHU unit as per manufacture details specifications etc complete.	117	Sqm	12094	1414998.00	13303.4	1556497.8
2.27	Supply / Installation / Testing / commissioning Ceiling Suspended Cabinet type Fresh Air Fans & Casing, drive, motor, Filter, mounting frame, starter, isolator & Necessary cabling & earthing strip For Following Capacities :As per AMCA210 standard "Laboratory Methods of testing fans for rating" Balancing quality - As per AMCA204 / ISO 1940 standard Supply, Installation, Testing & Commissioning of 1550CFM Cabinet Type	1	Nos	35310	35310.00	38841	38841

2.28	Supply / Installation / Testing / commissioning Ceiling Suspended Cabinet type Fresh Air Fans & Casing, drive, motor, Filter, mounting frame, starter, isolator & Necessary cabling & earthing strip For Following Capacities :As per AMCA210 standard "Laboratory Methods of testing fans for rating" Balancing quality - As per AMCA204 / ISO 1940 standard Supply, Installation, Testing & Commissioning of 1650 CFM Cabinet Type inline Fan	1	Nos	35310	35310.00	38841	38841
2.29	Supply / Installation / Testing / commissioning Ceiling Suspended Cabinet type Fresh Air Fans & Casing, drive, motor, Filter, mounting frame, starter, isolator & Necessary cabling & earthing strip For Following Capacities :As per AMCA210 standard "Laboratory Methods of testing fans for rating" Balancing quality - As per AMCA204 / ISO 1940 standard Supply, Installation, Testing & Commissioning of 2100 CFM Cabinet Type inline Fan	1	Nos	51184	51184.00	56302.4	56302.4
2.3	Supply, Installation, Testing & Commissioning of Freshair Axial fan For Lobby & other HVAC system Ventilation Unit With DIDW Fresh Air Fans & Casing. Supply, Installation, Testing & Commissioning of 4900 CFM	1	Nos	81899	81899.00	90088.9	90088.9
2.31	Supplying, installing, testing and commissioning of INLINE / PROPELLER FANS suitable for installing in any position in vertical or horizontal ducts. The casing shall be double skin, internally acoustically lined and constructed of galvanised steel. The fan shall be DIDW with forward curve impeller fitted with maintenance free external rotor motor. The motor shall be suitable for 220±10% volt single phase 50 cycles AC supply. All units shall be complete with duct flexible connector and volume control damper 800CFM	2	Nos	25625	51250.00	28187.5	56375
2.32	Supply, Installation, Testing & Commissioning of Exhaust Axial fan For Kitchen Ventilation Unit With DIDW Fresh Air Fans & Casing. Supply, Installation, Testing & Commissioning of 8900 CFM	1	Nos	109111	109111.00	120022.1	120022.1
2.33	Supply, Installation, Testing & Commissioning of Freshair Axial fan For Kitchen Ventilation Unit With DIDW Fresh Air Fans & Casing. Supply, Installation, Testing & Commissioning of 7000 CFM	1	Nos	99556	99556.00	109511.6	109511.6
2.34	Supply / Installation / Testing / BRICATED rectangular sheet metal ducts, as per specifications detailed in tender, made of Class VIII GI sheet as per SMACNA Standard for medium pressure air flow with MS angle / TDF flanges, supports, anchor fasteners, food grade gaskets and RTV sealant in accordance with the approved shop drawings. It is mandatory to use factory fabricated ducts for minimum 85% of the ducting system. Use of Site fabricated ducts should be restricted to only 'to suit' pieces. Cold rolled sheets continuous galvanized sheet steel with zinc coating as per class VIII confirming to IS 277-1962 (revised) (where ever specified) of LFQ (Lock Forming Quality) grade. Galvanizing shall be of 120gms/sq -m (Total coating on both sides) The fabrication of the ducting system for air-conditioning & Ventilation shall confirm to SMACNA-1995 standards ("HVAC Duct Construction Standards - Metal and Flexible - Second Edition - 1995"-SMACNA). Supply, Installation, Testing & Commissioning of G.I. ducting 22 G	445	Sqm	2041	908245.00	2245.1	999069.5
2.35	Grills & Diffusers : Supply, installation,testing and commissioning of extruded aluminium powder coated linear 4' Grilles for Supply /Return grill without volume control dampers	50	Sqm	11064	553200.00	12170.4	608520

	cylinder diesel engine developing suitable BHP at 1500 rpm with 10% overload for 1 hour in 12 hours, alongwith standard accessories, self excited self regulated, screen protected alternator with static excitation system running at 1500 RPM as per IS 4722-2001 with voltage regulation +/- 5 %. Both the engine and alternator direct coupled on a common fabricated steel base frame and mounted on anti vibrating pads with standard control panel comprising meters, switchgears, indicators connected with suitable wires/cables, the complete set enclosed in composite Acoustic enclosure as fully assembled integral unit made of 16 SWG CRCA Sheet, sound absorbing material to restrict sound level upto 75 dB at 1.0 m, provided with first filling of oil, diesel etc. and obtaining necessary approval from Electrical Inspector/MSEB/MPCB/PWD as per specification, The engine filling of oil, diesel etc whenever required upto handing over to User department. The DG set shall include all accessories items, protections, safety parameters, control Panel compatible with BMS (IP/BACNET/ ALL TYPE OF POTENTIAL FREE CONTACTS/ MODBUS ETC.), base frame with anti-vibration mount pad, fuel tank of 8 Hour capacity(750Ltrs to 999 Ltrs Tank capacity) with indicator, fuel pipe with pump, residential type exhaust silencer, 2X12 volt 180 amp-hour battery complete with copper conductor battery leads of required length and socket/clamps including G.I. stands for battery with wooden base, adaptor box etc complete as required for a 400 KVA DG Set as per the manufacturer recommendations. 400 KVA DG Set as per CPCB II norms, including No Load and Full load testing at Factory Before dispatched at site. EXHAUST ROUTING TO ATMOSPHERE FROM ENGINE: Exhaust system consisting of 10" ERW Pipe including bends, flanges & hardware etc. 10" ERW Pipe including bends, flanges & hardware etc. r above exhaust pipe with 50 mm thk. Rockwool slab of 100 Kg/ M3 , wrapped with 24 gauge Aluminium sheet. exhaust pipe with 50 mm thk. Rockwool slab of 100 Kg/ M3 , wrapped with 24 gauge Aluminium sheet. exhaust pipe & silencer , with one coat of primer and 2 coats of Enamel Paint Insulation for silencer, 50mm thk. Rockwool Slab of 100 Kg/ m3 and wrapped with 24 gauge Aluminum sheet Notes :- 1) Supply of all Misc. materials, required to complete the installation on " Turnkey " basis are to be included in above offer 2) Required working Drawing for foundation to be furnished by Contractor. 3) Work excluded from the scope of supply under " EXCLUSIONS " in covering specification shall be carried out by others but as per D.G. Supplier's instructions and supervision. 4) Charging of batteries is supposed to be included in quoted price /or equivalent / as Directed by Engineer in charge.						
2.75	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Auto Mains Failure, Auto synchronizing, auto load shearing panel for 400 KVA 3 Nos D.G. SETSAs per specification, as Directed by Engineer IN charge.	1	Nos	3325837	3325837.00	3658420.7	3658420.7

2.76	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 63A 4P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	6	Nos	3421	20526.00	3763.1	22578.6
2.77	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 50A 4P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	1	Nos	3421	3421.00	3763.1	3763.1
2.78	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 40A 4P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	1	Nos	3421	3421.00	3763.1	3763.1
2.79	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 32A 4P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	8	Nos	2415	19320.00	2656.5	21252
2.80	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 25A 4P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	10	Nos	2415	24150.00	2656.5	26565
2.81	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 16A 4P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	30	Nos	2415	72450.00	2656.5	79695
2.82	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 16A 2P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	23	Nos	1109	25507.00	1219.9	28057.7
2.83	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 25A 2P MCB Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A•	2	Nos	1109	2218.00	1219.9	2439.8
2.84	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating RCCBs 40A 2P 100mA RCCB Conforms to IEC 61008-1, EN 61008-1, IS 12640-1 Wide Range of Current Ratings - 16A to 100A Precise Sensitivities for variety of applications - from 10mA to 500mA 2P & 4P versions Suitable for Isolation & Protection Degree - IP 20 Availability of wide Range of Site Mountable Accessories Available in- Type AC : For standard AC installations	15	Nos	6880	103200.00	7568	113520
2.85	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating RCCBs 32A 2P 100mA RCCB Conforms to IEC 61008-1, EN 61008-1, IS 12640-1 Wide Range of Current Ratings - 16A to 100A Precise Sensitivities for variety of applications - from 10mA to 500mA 2P & 4P versions Suitable for Isolation & Protection Degree - IP 20 Availability of wide Range of Site Mountable Accessories Available in- Type AC : For standard AC installations / or equivalent / as Directed by Engineer Incharge	1	Nos	6880	6880.00	7568	7568
2.86	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating RCCBs 25A 2P 100mA RCCB Conforms to IEC 61008-1, EN 61008-1, IS 12640-1 Wide Range	39	Nos	6669	260091.00	7335.9	286100.1

	of Current Ratings - 16A to 100A Precise Sensitivities for variety of applications - from 10mA to 500mA 2P & 4P versions Suitable for Isolation & Protection Degree - IP 20 Availability of wide Range of Site Mountable Accessories Available in- Type AC : For standard AC installations.						
2.87	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating RCCBs 16A 2P 30mA RCCB Conforms to IEC 61008-1, EN 61008-1, IS 12640-1 Wide Range of Current Ratings - 16A to 100A Precise Sensitivities for variety of applications - from 10mA to 500mA 2P & 4P versions Suitable for Isolation & Protection Degree - IP 20 Availability of wide Range of Site Mountable Accessories Available in- Type AC : For standard AC installations.	13	Nos	6669	86697.00	7335.9	95366.7
2.88	Supplying, Loading, Unloading, Installations, Testing , Commissioning of Rating MCBs 6 TO 32A 1P 10kA Conforms to IS/IEC 60898-1, EN 60898-1, IEC 60898-1, EN 60947-2, IEC 60947-2 Wide Range of Current Ratings - 0.5A to 125A Short circuit Breaking Capacity 10kA (IEC 60898-1, EN 60898-1) 15kA (IEC 60947-2, EN 60947-2) - for 80A, 100A and 125A	383	Nos	345	132135.00	379.5	145348.5
2.89	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S.P, unbreakable concealed type modular switch box with double mounting plate for 1 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell push or Blank of unit complete.	30	Nos	421	12630.00	463.1	13893
2.9	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S.P, unbreakable concealed type modular switch box with double mounting plate for 2 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push or Blank of unit complete.	26	Nos	738	19110.00	808.5	21021
2.91	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S.P, unbreakable concealed type modular switch box with double mounting plate for 3 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push or Blank of unit complete.	8	Nos	564	4512.00	620.4	4963.2
2.92	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S.P, unbreakable concealed type modular switch box with double mounting plate for 4 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push or Blank of unit complete.	10	Nos	1331	13310.00	1464.1	14641

2.93	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S P, unbreakable concealed type modular switch box with double mounting plate for 6 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq.mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push or Blank of unit complete.	9	Nos	1638	14742.00	1801.8	16216.2
2.94	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S P, unbreakable concealed type modular switch box with double mounting plate for 8 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq.mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push or Blank of unit complete.	10	Nos	2472	24720.00	2719.2	27192
2.95	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S P, unbreakable concealed type modular switch box with double mounting plate for 12/16 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq.mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push or Blank of unit complete.	12	Nos	3130	37560.00	3443	41316
2.96	Supply And erecting Switch board for light on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S P, unbreakable concealed type modular switch box with double mounting plate for 18 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq.mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push or Blank of unit complete.	5	Nos	3547	17735.00	3901.7	19508.5
2.97	Supply And erecting Switch board for Ceiling fan on wall, false ceiling and concealed in Wall, Panels, etc with modular type switch 6A / 10A S P, unbreakable concealed type modular switch box with double mounting plate for 3 module duly erected flush to wall with required chiselling and finishing with cement mortar / POP using 3 x 1.5 Sq.mm. [P, N, E] Multistranded Copper Conductor, FRLS PVC insulated, 1100 V grade, Color Coded, ISI marked wires, & Accessories. The Point with Switch Board Light Points controlled by one 6A/10A S.P. Switch / bell Push With regulator complete.	10	Nos	2300	23000.00	2530	25300
2.98	Supply and installation of switch board for UPS Plugs, with ISI mark 1.1 KV grade PVC insulated copper wire with 2.5 Sq.mm ISI mark PVC insulated copper wire in green color used for earthing in existing PVC conduit on the board complete with 3 Nos. 5 pin 16A modular type socket and 1 No 16 Amp modular type Switch erected on original sheet metal / non metallic un-breakable box flush on wall / partition complete with double (mounting & cover) plate.	409	Nos	1021	417589.00	1123.1	459347.9

2.99	Supply and installation of switch board for Power Plug, on board with ISI mark 2-4 sq mm 1.1 KV grade PVC insulated copper wire with 2.5 Sq mm ISI mark PVC insulated copper wire in green color used for earthing in existing rigid PVC conduit on board for plug complete with 6 pin 6A & 16 A modular type socket and 16 Amp modular type Switch erected on original sheet metal / non metallic un-breakable box flush on wall with double (mounting & cover) plate.	150	Nos	1021	153150.00	1123.1	168465
3	Supply and installation of switch board for Telephone concealed type with existing telephone cable in existing concealed rigid PVC conduit for plug complete erected on original sheet metal / non metallic un-breakable box flush on wall with double (mounting & cover) plate. (Only Point)	20	Nos	1487	29740.00	1635.7	32714
3.01	Supplying and erecting Multistranded Copper Conductor FRLS PVC insulated, Color Coded, 1100 V grade, ISI marked wires, to be laid in item above 2 x 1.5 Sq.mm. [P, N] Wires. + 1 x 1.5 Sq mm. [E]	37000	Rmt	250	9250000.00	269	7733000
3.02	Supplying and erecting Multistranded Copper Conductor FRLS PVC insulated, Color Coded, 1100 V grade, ISI marked wires, to be laid in item above 2 x 2.5 Sq.mm. [P, N] Wires. + 1 x 2.5 Sq mm. [E]	29000	Rmt	250	7250000.00	193.6	5614400
3.03	Supplying and erecting Multistranded Copper Conductor FRLS PVC insulated, Color Coded, 1100 V grade, ISI marked wires, to be laid in item above 2 x 4 Sq. mm. [P, N] Wires. + 1 x 4 Sq mm. [E]	11000	Rmt	250	2750000.00	266.2	2928200
3.04	Supplying and erecting Multistranded Copper Conductor FRLS PVC insulated, Color Coded, 1100 V grade, ISI marked wires, to be laid in item above 4 x 4 Sq. mm. [R, Y,B, N] Wires. + 1 x 4 Sq mm. [E]	3500	Rmt	500	1750000.00	443.3	1551550
3.05	Supplying and erecting Multistranded Copper Conductor FRLS PVC insulated, Color Coded, 1100 V grade, ISI marked wires, to be laid in item above 4 x 10 Sq. mm. [P, N] Wires. + 1 x 10 Sq mm. [E]	1000	Rmt	613	613000.00	674.3	674300
3.06	Supplying and erecting I.S.I. mark Rigid P.V.C. conduit 20 mm. dia with necessary accessories 20mm H.G. PVC conduit, with accessories as Junction Boxes, Couplers, on ceiling, Wall, panels etc. for following. a) light board Submains b) 3P 6A Socket Switch computer Points c) 3P 6 / 16A Socket Switch Point d) Cat -6 Cable Point e) Telephone Cable Point. Etc.	8000	Rmt	76	608000.00	83.6	668800
3.07	Supplying and erecting I.S.I. mark Rigid P.V.C. conduit 25 mm. dia. with necessary accessories 25mm H.G. PVC conduit, with accessories as Junction Boxes, Couplers, on ceiling, Wall, panels etc. for following. a) light board Submains b) 3P 6A Socket Switch computer Points c) 3P 6 / 16A Socket Switch Point d) Cat -6 Cable Point e) Telephone Cable Point. Etc.	10000	Rmt	96	960000.00	105.6	1056000
3.08	Supplying and erecting I.S.I. mark Rigid P.V.C. conduit 32 mm. dia. with necessary accessories 32mm H.G. PVC conduit, with accessories as Junction Boxes, Couplers, on ceiling, Wall, panels etc. for following. a) light board Submains b) 3P 6A Socket Switch computer Points c) 3P 6 / 16A Socket Switch Point d) Cat -6 Cable Point e) Telephone Cable Point. Etc	1000	Rmt	151	151000.00	166.1	166100
3.09	Supplying and erecting I.S.I. mark Flexible P.V.C. conduit 40 mm. dia. with necessary accessories 40mm H.G. PVC conduit, with accessories as Junction Boxes, Couplers, on ceiling, Wall, panels etc. for following. a) light board Submains b) 3P 6A Socket Switch computer Points c) 3P 6 / 16A Socket Switch Point d) Cat -6 Cable Point e) Telephone Cable Point. Etc.	500	Rmt	198	99000.00	217.8	108900
3.1	Supplying and erecting I.S.I. mark Flexible P.V.C. conduit 50 mm. dia. with necessary accessories 50mm H.G. PVC conduit, with accessories as Junction Boxes, Couplers, on ceiling, Wall, panels etc. for following. a) light board Submains b) 3P 6A Socket Switch	199	Rmt	300	59700.00	330	65670

	computer Points c) 3P 6 / 16A Socket Switch Point d) Cat -6 Cable Point e) Telephone Cable Point Etc.						
3.11	Supplying and erecting unbreakable concealed type modular switch box with double mounting plate for 4 module duly flushed to wall with required chiselling and finishing with cement mortar / POP as per required to match the background.	50	Nos	600	30000.00	660	33000
3.12	SITC of 1100 V grade XLPE insulated sheathed & steel armoured Aluminium Conductor cables. Unloading by crane, shifting to place of work and laid on walls / ceiling / ready made trench / Cable tray / Through underground RCC pipes / including spacers / saddles / clamps / G.I. Hardware as required, (M.S. cable trays supports / cable trays, RCC pipes covered by separate items) with Termination of cable using screwed flange type elliptical / conical, heavy duty brass glands, crimping sockets including 3.5 C X 300 Sq. mm. A X F Y XLPE	2060	Rmt	4500	9270000.00	9350	19261000
3.13	SITC of 1100 V grade XLPE insulated sheathed & steel armoured Aluminium Conductor cables. Unloading by crane, shifting to place of work and laid on walls / ceiling / ready made trench / Cable tray / Through underground RCC pipes / including spacers / saddles / clamps / G.I. Hardware as required, (M.S. cable trays supports / cable trays, RCC pipes covered by separate items) with Termination of cable using screwed flange type elliptical / conical, heavy duty brass glands, crimping sockets including 3.5 C X 185 Sq. mm. A X F Y XLPE	500	Rmt	4500	2250000.00	9350	4675000

3.4	Supplying & erecting crimping type Copper lugs for cable 25 sq mm complete	40	Nos.	36	1440.00	39.6	1584
3.41	Supplying & erecting crimping type Copper lugs for cable 35 sq mm complete	40	Nos.	42	1680.00	46.2	1848
3.42	Supply, installing, and testing of maintenance free earthing comprising of electrode of 17.2 mm diameter Low Carbon Steel with 250 micron molecular copper bonded earthing rod of Length 3m along with Carbon based environment friendly back fill ground enhancing compound required to fill up the excavated earth with required quantity (min. 125kg) complete, and recording the results	10	Nos.	27000	270000.00	29700	297000
3.43	Supplying and laying (including excavation of suitable width & depth up to 90 cm) 120 mm outside dia. double wall corrugated pipes (DWC) of HDPE for enclosing cable below ground/road surface, complete	100	Rmt	5000	500000.00	5500	550000
3.44	Supplying and erecting GI earth conductor of required sizes used for earthing or any other purposes on wall with necessary GI clamps fixed on wall/cable/ conduit with screws complete(8 SWG)	50	KG	300	15000.00	330	16500
3.45	Supplying and laying of Hot deeped Galvanised Perforated type Cable tray manufactured from 16 swg (1.6 mm thick), including couplers, G.I. Bolts, nuts, washers, necessary G.I. Hardware to be mounted on M.S fabricated supports (considered in separate item) Sizes as follows 500 x 75 mm.	100	Rmt	1800	180000.00	1980	198000
3.46	Supplying and laying of Hot deeped Galvanised Perforated type Cable tray manufactured from 16 swg (1.6 mm thick), including couplers, G.I. Bolts, nuts, washers, necessary G.I. Hardware to be mounted on M.S fabricated supports (considered in separate item) Sizes as follows 400 x 75 mm.	100	Rmt	1800	180000.00	1980	198000
3.47	Supplying and laying of Hot deeped Galvanised Perforated type Cable tray manufactured from 16 swg (1.6 mm thick), including couplers, G.I. Bolts, nuts, washers, necessary G.I. Hardware to be mounted on M.S fabricated supports (considered in separate item) Sizes as follows 300 x 100 mm.	100	Rmt	1800	180000.00	1980	198000
3.48	Supplying and laying of Hot deeped Galvanised Perforated type Cable tray manufactured from 16 swg (1.6 mm thick), including couplers, G.I. Bolts, nuts, washers, necessary G.I. Hardware to be mounted on M.S fabricated supports (considered in separate item .) Sizes as follows 300 x 50/75 mm.	100	Rmt	1800	180000.00	1980	198000
3.49	Supplying and laying of Hot deeped Galvanised Perforated type Cable tray manufactured from 16 swg (1.6 mm thick), including couplers, G.I. Bolts, nuts, washers, necessary G.I. Hardware to be mounted on M.S fabricated supports (considered in separate item .) Sizes as follows 200 x 50/75 mm.	100	Rmt	1800	180000.00	1980	198000
3.5	Supplying and laying of Hot deeped Galvanised Perforated type Cable tray manufactured from 16 swg (1.6 mm thick), including couplers, G.I. Bolts, nuts, washers, necessary G.I. Hardware	100	Rmt	1800	180000.00	1980	198000

	to be mounted on M.S fabricated supports (considered in separate item) Sizes as follows 150 x 50/75 mm.						
3.51	SITCof Hitech suspension Support G.I. 10 MM dia Threaded Tie Rod for supporting of cable tray of any length with G.I Hardware, install between Trusses G.I. Rail Channel Strip / Trusses welded clamp & supporting angle / GI Rail Channel strip below of cable tray. (Supporting angle/ welded strip/ Rail Channel covered in seprate item)	50	Mtrs.	190	9500.00	209	10450
3.52	SITC of Hitech Support G.I. 2 MM Thick X 30 mm Width Rail Channel strip for supporting of cable tray of any length, install on Trusses & supporting of cable tray. (Supporting Threaded Rod & welded strip covered in seprate item)	100	Mtrs.	180	18000.00	198	19800
3.53	SITC of M.S fabricated supports for cable trays of M.S sections welded to structure / clamped to structure / wall, using anchor bolts where required including G.I. hardware & painting with Two coats of Red oxide primer & 2 coats of enamel paint of approved shade. (colour As per Ex.)	90	KG	110	9900.00	121	10890
3.54	Supplying and erecting anodized aluminium mirror light LED fitting (2 feet) for toilet area Indirect lighting Max. 12W with high transitivity diffuser with min. system lumens output of 1200 lumens, min. efficacy of 100 lumens/W, CRI>80, CCT upto 6000K, Beam Angle of 110 deg., Ripple<5%, THD<20%, p.f >0.95, operating range of 200-270V, surge protection of 2 kV, Life class of 50,000 Hrs at L70B50 including driver with end caps on provided PVC Block / wooded board with minimum 2 years warranty as per specification No. FG-IDF/LED	22	Nos	12500	275000.00	13750	302500
3.55	Supply, installation, testing & commissioning of following light fixtures complete with: a) All fixing accessories, mounting Brackets, anchor fasteners, suspension wires/chains etc. necessary for completeness of installation. b) Drivers / Controllers with housing. c) Lamp of specified wattage. d) Earthing of fittings. e) Diffuser shall lit up uniformly without any black spot on diffuser. f) Light fixture finishes should be as specified. g) Any visible power supply cable to light fixture shall be transparent. h) All suspended fixtures shall be provided with SS caps to put around suspension at false ceiling level Note: 1) In addition to above mentioned accessories details, vendor to consider specific light fixture requirement mentioned along-with light fixture. 2) Light Fixtures final confirmation to be done by Architect and Lighting Consultant. MR 1.2M Long 25mm THK Concealed Profile light with 30W PER METER LED STRIP LIGHT	62	Nos	6917	428854.00	7608.7	471739.4

3.73	Live Action Shoot Story 2 MR Undertake Test Shoots And Experiments To Deduce Appropriate Camera Angles For The Specific Measurement Requirements Of The Target Environment ,Professional Services Of The Director, Director Of Photography, Camera Crew, Lighting Crew, Sound Recordist, And Other Sundry Shoot Crew Totalling 40 Crew Members For Mentioned Days Of Shoot.Rent Of Lighting Systems For Croma Lighting, Subject Lighting For Camera, And Stage Lighting Of The Set, For Mentioned Days Of Shoot Professional Services Of The Visual Effects Supervisor For Mentioned Days Of Shoot MR	2	nos.	1334500	2669000.00	1467950	2935900
3.74	Writing the complete script story 2 MR This refers to the forming of the story in written form, wherein the idea behind the installation is visualised and thought of. The same script is then referred for all cgi creation and further development. MR	1	no.	334395	334395.00	367834.5	367834.5
3.75	Photorealistic Head Modelling story 2 MR Recreating Model Of The Personality Head in three dimension for it to be used in the process ahead. Three-dimensional (3D) models should represent a physical body using a collection of points in 3D space, connected by various geometric entities such as triangles, lines, curved surfaces, etc. Being a collection of data (points and other information), 3D models can be created by hand, algorithmically (procedural modeling), or scanned. MR	1	no.	941760	941760.00	1035936	1035936
3.76	Photorealistic Head Texturing story 2MR In this process you would need to create colours, paints and textures for the above model so that it is realistic, for which you will have to use a method called multi texturing. Multitexturing is the use of more than one texture at a time on a polygon. For instance, a light map texture may be used to light a surface as an alternative to recalculating that lighting every time the surface is rendered. Microtextures or detail textures will be needed to add higher frequency details, and dirt maps may add weathering and variation; this can greatly reduce the apparent periodicity of repeating textures. Modern graphics may use more than 10 layers, which are combined using shaders, for greater fidelity. Another multitexture technique is bump mapping, which allows a texture to directly control the facing direction of a surface for the purposes of its lighting calculations; it can give a very good appearance of a complex surface (such as tree bark or rough concrete) that takes on lighting detail in addition to the usual detailed coloring. MR	1	no.	561750	561750.00	617925	617925

3.77	Rigging story 2 In this process you will be required to put digital joints and muscles so that the above model can be animated realistically. This technique is used by constructing a series of 'bones,' sometimes referred to as rigging. Each bone has a three-dimensional transformation from the default bind pose (which includes its position, scale and orientation), and an optional parent bone. The bones therefore form a hierarchy. The full transform of a child node is the product of its parent transform and its own transform. So moving a thigh-bone will move the lower leg too. As the character is animated, the bones change their transformation over time, under the influence of some animation controller. A rig is generally composed of both forward kinematics and inverse kinematics parts that may interact with each other. Skeletal animation is referring to the forward kinematics part of the rig, where a complete set of bone configurations identifies a unique pose. Each bone in the skeleton is associated with some portion of the character's visual representation in a process called skinning. In the most common case of a polygonal mesh character, the bone is associated with a group of vertices; for example, in a model of a human being, the 'thigh' bone would be associated with the vertices making up the polygons in the model's thigh. Portions of the character's skin can normally be associated with multiple bones, each one having a scaling factors called vertex weights, or blend weights. The movement of skin near the joints of two bones, can therefore be influenced by both bones. For a polygonal mesh, each vertex can have a blend weight for each bone. To calculate the final position of the vertex, a transformation matrix is created for each bone which, when applied to the vertex, first puts the vertex in bone space then puts it back into mesh space. After applying a matrix to the vertex, it is scaled by its corresponding weight. MR	1	no.	121900	121900.00	134090	134090
3.78	Photorealistic Head Lighting story 2 In this process you will need to match the lighting of the textured model to the shoot for it to look seamless. It refers to the simulation of light in computer graphics. This simulation can either be extremely accurate, as is the case in an application like Radiance which attempts to track the energy flow of light interacting with materials using radiosity computational techniques. Alternatively, the simulation can simply be inspired by light physics, as is the case with non-photorealistic rendering. In both cases, a shading model will be used to describe how surfaces respond to light. Between these two extremes, there are many different rendering approaches which can be employed to achieve almost any desired visual result. MR	1	no.	231629	231629.00	254791.9	254791.9
3.79	Hologram Head Animation - 10 minutes story 2 MR Computer animation is the process used for generating animated images. The more general term computer-generated imagery (CGI) encompasses both static scenes and dynamic images, while computer animation only refers to the moving images. Computer animation is essentially a digital successor to the stop motion techniques using 3D models, and traditional animation techniques using frame-by-frame animation of 2D illustrations. Computer-generated animations are more controllable than other more physically based processes, constructing miniatures for effects shots or hiring extras for crowd scenes, and because it allows the creation of images that would not be feasible using any other technology. It can also allow a single graphic artist to produce such content without the use of actors, expensive set pieces, or props. To create the illusion of movement, an image is displayed	600	sec.	7876	4725600.00	8663.6	5198160

	on the computer monitor and repeatedly replaced by a new image that is similar to it, but advanced slightly in time.						
3.8	CGI Head Replacement on a Live Action Character and 3D Tracking (12 Minutes) MR This refers to the replacement of the actual human head with the one which is CGI created in a computer software with all the facial animations and lighting. The animated head is then placed/tracked frame by frame over the moving human so as to completely overlap the actual head . MR	720	sec.	2500	1800000.00	6392.1	4602312
3.81	Hologram Visual FX / Holographic Imagery 12 minutes MR This refers to creating of various graphical/visual elements in tune with the script/storyboard of the desired installation in order to enhance the visual story telling. This involves creation of element in various softwares and then compiling into one visual element . MR	720	sec.	6100	4392000.00	7811.1	5623992
3.82	Creating and Editing the Sound Effects MR Combining (Mixing) the 4K Output Video, the dubbed voice track, the sound effects, and original music into a single Master Video for playback through the Holographic Projection System MR	1	no.	276550	276550.00	304205	304205
3.83	Chroma Keying and Roto MR a photographic compositing technique based on the separation of colors in the original images especially : blue screen sense Rotoscoping is the technique of manually creating a matte for an element on a live-action plate so it may be composited over another background MR	720	sec.	2150	1548000.00	2636.7	1898424
3.84	4K Holographic Rendering MR This refers to the the image compilation of the composited output to form the final image/visual . The process involves processing of the various 4k element to be combined to form a single image. MR	24000	frame	412	9888000.00	453.2	10876800
3.85	Compositing MR It represents each media object in a composite as a separate layer within a timeline, each with its own time bounds, effects, and keyframes. All the layers are stacked, one above the next, in any desired order, and the bottom layer is usually rendered as a base in the resultant image, with each higher layer being progressively rendered on top of the previously composited of layers, moving upward until all layers have been rendered into the final composite. Layer-based compositing is very well suited for rapid 2D and limited 3D effects such as in motion graphics, but becomes awkward for more complex composites entailing a large number of layers. A partial solution to this is some programs' ability to view the composite-order of elements (such as images, effects, or other attributes) with a visual diagram called a flowchart to nest compositions, or "comps," directly into other compositions, thereby adding complexity to the render-order by first compositing layers in the beginning composition, then combining that resultant image with the layered images from the preceding composition, and so onMR	24000	frame	173	4152000.00	190.3	4567200
3.86	Technical Architecture Design .It refers to the high level structures of a software system and the discipline of creating such structures and systems. Each structure comprises software elements, relations among them, and properties of both elements and relations. It functions as a blueprint for the system and the developing project, laying out the tasks necessary to be executed by the design teams. It is about making fundamental structural choices which are costly to change once implemented. Software architecture choices include specific structural options from possibilities in the design of	1	no.	782000	782000.00	772200	772200

	software. For example, the systems that controlled the space shuttle launch vehicle had the requirement of being very fast and very reliable. Therefore, an appropriate real-time computing language would need to be chosen. Additionally, to satisfy the need for reliability the choice could be made to have multiple redundant and independently produced copies of the program, and to run these copies on independent hardware while cross-checking results. MR						
3.87	Fabrication Design and 3D Visualisation MR This refers to creation of the physical insulation inside of a software program to visualise how its going to look in the real world before the actual onground production MR	1	no.	233200	233200.00	256520	256520
3.88	Software Programming: MR It is the process of designing and building an executable computer program for accomplishing a specific computing task. Programming will involve tasks such as: analysis, generating algorithms, profiling algorithms' accuracy and resource consumption, and the implementation of algorithms in a chosen programming language (commonly referred to as coding). The source code of a program is written in one or more languages that are intelligible to programmers, rather than machine code, which is directly executed by the central processing unit. The purpose of programming is to find a sequence of instructions that will automate the performance of a task (which can be as complex as an operating system) on a computer, often for solving a given problem. The process of programming thus often requires expertise in several different subjects, including knowledge of the application domain, specialized algorithms, and formal logic. The system splits the media in to two zones , low res for visualisation of the playback in the control room and 4K for the main holographic playback. Also gives turnkey playback system from the control unit. MR	1	no.	1686500	1686500.00	1855150	1855150
3.89	Asset Integration MR asset integration refers to the compiling/placing/integration/optimisation of the various elements (graphics/cgi) needed to from the front end of the desired application/installation MR	1	no.	135000	135000.00	148500	148500
3.90	Testing / Compilation It is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation. Test techniques include the process of executing a program or application with the intent of finding software bugs (errors or other defects), and verifying that the software product is fit for use. MR	1	no.	159000	159000.00	174900	174900
3.91	Installation / Integration This includes the setting up of the physical installation including mounting of the projectors /screens/and loading and executuin of the required software/licenses (Hologram) MR	1	no.	399587	399587.00	439545.7	439545.7
3.92	UI / UX This is design balance process it balances technical functionality and visual elements. this is to create a system that is not only operational but also usable and adaptable to changing user needs.(Hologram) MR	1	no.	901000	901000.00	991100	991100

4.28	Software Programming for Video on Led Wall : It is the process of designing and building an executable computer program for accomplishing a specific computing task. Programming involves tasks such as: analysis, generating algorithms, profiling algorithms' accuracy and resource consumption, and the implementation of algorithms in a chosen programming language (commonly referred to as coding). The source code of a program is written in one or more languages that are intelligible to programmers, rather than machine code, which is directly executed by the central processing unit. The purpose of programming is to find a sequence of instructions that will automate the performance of a task (which can be as complex as an operating system) on a computer, often for solving a given problem. The process of programming thus often requires expertise in several different subjects, including knowledge of the application domain, specialized algorithms, and formal logic. It interfaces all the pages of the book in a interactive way, pages are combinations of static images and videos	1	Nos	350000	350000.00	385000	385000
4.29	Asset Integration for Video on Led Wall	1	Nos	60000	60000.00	66000	66000
4.3	Testing / Compilation for Video on Led Wall : It is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation. Test techniques include the process of executing a program or application with the intent of finding software bugs (errors or other defects), and verifying that the software product is fit for use.	1	Nos	250000	250000.00	275000	275000

4.46	Bumped, coaxial two-way point source loudspeaker with a single 12-15" LF driver and compression driver with 3" or better Voice coil. Frequency Range (-10dB) of 60Hz - 20kHz or better & long term Continuous Power Handling of 300W (Low frequency) and 45W for High Frequency driver or better. The Loudspeaker module shall have a Max. SPL (Peak) of MF/HF >= 131 or better. It should have Horizontal dispersion pattern of 110° or better, vertical dispersion of the loudspeaker shall be 60 degrees or better. The loudspeaker shall be enclosed in a Baltic birch plywood enclosure with perforated steel grille.	2	Nos.	300000	600000.00	330000	660000
4.47	Multipurpose subwoofer with a single 15" neodymium LF driver. Frequency Range (-10dB) of 35Hz - 130Hz or better & long term Continuous Power Handling of 500W or better. It should have an axial Sensitivity of > - 90dB (1W/1m) or more delivering a free field Max. Calculated SPL(peak) of >= 124db or better. The loudspeaker should have a nominal impedance of 8 ohm or more. The loudspeaker shall be enclosed in a Baltic birch plywood enclosure with perforated steel grille. Complete with installation as per the site requirement.	2	Nos.	275000	550000.00	302500	605000
4.48	Active Portable loudspeaker system with 2 combo XLR-1/4" inputs, 3.5 mm input, Bluetooth inputs and 1/4" TRS line output with 11 hours of play time using the rechargeable lithium ion battery with Freq Response 62Hz - 17kHz and 109dB peak SPL, 120 H x 50V Nominal coverage	2	Nos.	125000	250000.00	137500	275000
4.49	Two-way Small Format high SPL IP55 rated (as per IEC 60529) all weather surface mount loudspeaker. The loudspeaker shall meet the following performance criteria: Frequency Range (-10 dB) of 90 Hz - 18 kHz or better; Nominal Dispersion : 100H x 100V; Power	2	Nos.	90000	180000.00	99000	198000

	handling of 400W peak or more, Sensitivity : 90 dB and the Max SPL : 118dB Peak or better; Nominal impedance of 8 ohms and Integral multi-tap Transformer with selectable tap settings of 10/20/40/80 W @70V & 100V. The loudspeaker system shall be comprised of a Powder-coated finish stainless steel grille with Two-part spray polyurea coating Enclosure; Single 5.25-inch woofer, Single 2-inch voice coil high-frequency compression driver, U bracket shall be included						
4.5	Class D amplifier with 2 x 600 W Load-independent outputs deliver full channel power to either low-impedance (4-8 Ω) or high-impedance (70/100V) loads without bridging. Amplifier shall have frequency response of 20 Hz to 20 kHz (+/- 1 dB) for L2 mode, with THD+N at rated power less than 0.04%. The amplifier shall meet or exceed the following performance specifications: channel separation (crosstalk) greater than 80 dB below rated power at 1 kHz. The amplifier shall have 2 line-level inputs with selectable input sensitivity settings (-10 dBV, 4 dBu and 14 dBu) for balanced line-level inputs (6-pin Euroblock connector) and possibility of 4 or more no. of digital Audio channels . The amplifier shall offer a master mute connection for use with external dry contacts, normally open or normally closed, to mute all outputs of the amplifier.	2	Nos.	138529	277058.00	152381.9	304763.8
4.51	Class D amplifier with 2 x 1000 W Load-independent outputs deliver full channel power to either low-impedance (4-8 Ω) or high-impedance (70/100V) loads without bridging. Amplifier shall have frequency response of 20 Hz to 20 kHz (+/- 1 dB) for L2 mode, with THD+N at rated power less than 0.04%. The amplifier shall meet or exceed the following performance specifications: channel separation (crosstalk) greater than 80 dB below rated power at 1 kHz. The amplifier shall have 2 line-level inputs with selectable input sensitivity settings (-10 dBV, 4 dBu and 14 dBu) for balanced line-level inputs (6-pin Euroblock connector) and possibility of 4 or more no. of digital Audio channels . The amplifier shall offer a master mute connection for use with external dry contacts, normally open or normally closed, to mute all outputs of the amplifier.	1	Nos.	180265	180265.00	198291.5	198291.5
4.52	Digital Sound Processor with 8 Mic/Line inputs or more & 8 analog outputs or more , 24 Bit A-D and D-A Convertors, Sampling Rate : 48 kHz, THD : < 0.002 %, Channel Separation (Crosstalk) : < 105 dB ; Frequency Response 20 Hz - 20 kHz ; Signal-to-Noise Ratio 80 dB ,Dynamic Range : > 115 dB, 5 Control Inputs and Outputs; RS-232 and Ethernet Port for third party Control and Monitoring; inbuilt DSP features like Input Equalizers, Router, Band Pass filter, Output Equalizer, Delay, Limiters, gates , Source selectors etc	1	No.	284754	284754.00	313229.4	313229.4
4.53	Networked and programmable controller; Power supply requirement of 15-24 VDC, 300mA; Four rotatory encoders with circular LED rings for managing gain setting or scene selection; Fifth encoder provides control over programmed scenes or presets; Two line by 40 character backlit LCD provides names of the system elements they are controlling.	1	No.	149778	149778.00	164755.8	164755.8

नमूद कामाकरीता मे, शायोना कॉर्पोरेशन यांनी वरील दराची निविदा सादर केली आहे. परंतु सदरचे दर हे अंदाजप्रक्रिया दरोक्ता जास्तीचे असल्याने कंबाटदार यांनी दरवाटापाठीनंतर 16.32% दर कमी करून दिलेले असून त्यानुसार सदर निविदा रक्कम ही रु.40,53,15,728/- एवढी होत आहे.

सदर कमी केलेल्या दरानुसार निविदा रक्कम रु.40,53,15,728/- एवढी होत असून मे, शायोना कॉर्पोरेशन यांची मंजूर रकमे एवढीच निविदा रक्कम होत आहे. नगरविकास विभागाकडील शासन निर्णय व मा. जिल्हाधिकारी ठाणे यांदेकडील प्रशासकिय मान्यतेच्या आदेशात नमूद केल्यानुसार वितरीत निधी व्यतिरिक्त उर्वरीत निधी प्रतिवर्षी वितरीत करण्यात येणार असल्याने त्यानुसार प्राप्त तरतूदीच्या भर्याईत टप्प्याटप्प्याने कामे हाती घेण्यात येतील ही अट नमूद करून कायदेश देण्यात येतील.

नगरविकास विभाग, शासन आदेश क्रमांक एमसीओ-2020/प.फ.71 (भाग-2)/नंदि-14 टि.26 ऑगस्ट 2022 अन्वय महाराष्ट्र महानगरपालिका अधिनियम तरतुद व विशेषत: कलम 452 अ च्या (1 अ) व (1 ब) मधील तरतुदीनुसार मा.आयुक्त यांची प्रशासक पट्टी नियुक्ती करण्यात आली असून त्यांना अधिनियमातील सर्व अधिकार प्राप्त झाले आहेत. सदर अधिकारात वरील कामांस महाराष्ट्र महानगरपालिका अधिनियम मधील कलम 73 (क) नुसार प्रशासकीय ठरावाढारे मान्यता देण्याचा प्रस्ताव प्रशासनाने सादर केला आहे.

वरील कामाबाबतची पुढील कायदाही नियमानुसार संबंधित विभागाने विहित पट्टीने करावी.
